

Chapter 5.

5.2 ALGORITHM FOR VARIOUS PROGRAMS

Name of the Program : TAXMENU.PRG

Purpose/ Utility :

Display Main Menu with various options of Tax-system.

- Steps : 1. Use Foxpro 2.5 (RDBMS) to run the above software.
2. Standard setup
 3. Wait for few seconds or press enter in the menu.
 4. Define various options required.
 5. Links all options with mainmenu.
 6. Perform options as per requirement.
 7. Exit/Stop.

Name Of The Program : TMAIN.PRG

The program written for various menues/option.

- Steps : 1. Select appropriate options.
2. Get the payers name & Address and other informaton regarding the tax payer, the duration, the mode of tax payment.
 3. Select either of 3 options.
 1. New data creation.
 2. Data-corrections.
 3. Data validation
 4. Heads Display for required data-names.
 5. Store data for appropriate fields.
 6. Stop.

Name Of The Program : TRATE.PRG

Purpose: Program for calculation according to class of paid tax.

CHAPTER 5

5.1. DATA ANALYSIS :-

The data collected from various resources was appropriately tabulated. The tabulated data further used for graphs. The procedures for tax collection is generally done in three sessions :

- 1) Annually
- 2) Quarterly
- 3) For more than one quarter
- 4) For any period less than a quarter

Likewise to incorporate with above methods appropriate system design has been done and various database were designed. On the base of requirements of procedures were done and using appropriate computer Language / Package the programmes were developed. Data analysis include various database design coding of region, districts and for private & public sector is done.

- Collection of data for a particular duration
- Analysis of revenue collection from transport of revenue collected
- From transport of revenues and Non-transport Vehicles.

- Steps :
1. Accept data for various fields as registration no.
 2. Enter the Registration number. if it is new one then go for data entry option.
 3. If registration code is given duplicate then it will edit the record.
 4. For correction in record or Validation enter the number to be validated.
 5. Calculation of duration after getting the from & to date.
 6. Calculation according to duration slab & given standard schedules.
 7. Display calculated tax for the duration.
 - 8 Store the calculated tax for the particular record.
 9. Print/Display the calculated tax.
 10. Stop.

Name Of The Pogram : ADDIST.PRG

Purpose : This program adds new record of districts.

- Steps :
1. Get region code and other details.
 2. Get region name, district code, and name of the district.
 3. Select option as correction & validation of data/record.
 4. Store the latest changes.
 5. Print/display required details.
 6. stop.

Name Of The Program : DIST_RVN.PRG

Purpose : Data entry of district revenue & printing districtwise revenue.

Steps : 1. Get district code, other values for year.
2. Calculation of total revenue collected.
3. Procedure for Comparison with last years total.
4. Print the details regarding Kolhapur District.
5 Stop.

Name of the program : CHK-POST.PR6

Purpose: For printing progressive revenue collection of various checkposts.

Steps : i) Get ckeck-post code,check for validation.
ii) Data entry is done for required fields.
iii) Calculate the total for reapeitive.
iv) Printing of details of check-post.
v) Stop.

Name of the program : FLSQD-RV.PR6.

Purpose: For data entry of the related fields and printing the details.

Steps : 1) select option for data entry.
2) Get values for fields.
3) Process and calculate the required details.
4) Print the details as required.
5) Stop.

Database File Description :-

Following are the fields created in the Master file.

(1) Registration Number:- When the Motor is brought to R.T.O. office, for the Registration of that vehicle a unique number is assigned by the Registration Authority of Motor vehicles Dept. The given number is thus never repeated, because it represents the identity of the vehicle.

(2) Registration Date:- The date on which the Motor Vehicle is registered, i.e. particular date, month & year. This is an important aspect considering this the reports may be generated i.e. how many vehicles were registered for the particular period.

(3) Name & Address:- The owner name and the address of the owner, name and the vehicle name is stored.

(4) Tal-Code & Name:- The name of the taluka and a given code for the same.

(5) Veh-Type :- Here the type of vehicle i.e. actually the body type is given.

(6) Veh-Model:- Here the model of which year is stored.

(7) Veh-Tax:- The vehicle under which Tax class it come. e.g. Class A, Class B, Class C. etc.

(8) Non-Tran:- Whether it is Transport or Non Transport

vehicle it is noted here.

Dist.DBF

Region-Code :- This is the Code given for each region.

District-Code:- The code given for each district.This code may help in generating reports according to districts.

Dist-Name:- Under this field the name of the District may is given.

Talq.DBF

Dist-Code:- The code given to specify the district.

Tal-Code :- It specifies the code of Taluka.

Tal-Name :- This field specifies the name of Taluka and its information.

Tax.DBF

Registration-Code:- The uniquely given code which gives information about registration of vehicle.

Class-Type:- The Motor-Vehicles are divided into classes These are as Class A, Class B and Class C. Further these classes are divided into subclasses.

Annual-Rate:- Under the Motor Vehicles Act various Schedules the Annual Tax Rate of each Vehicle is fixed according to their capacity and unladen weight of Motor-Vehicles.

From-Date:- The Tax from which date it is noted here.

To-Date:- The last date up to which the Tax is being paid.

Total-Tax:- Under this field the calculated Tax for a particular duration is stored.

Graph For Tot.Revenue Of M.S. Year v/s Heads

Table 1.

It is observed from the above table that the tax is levied under various heads. The heads are divided into 3 main parts. Under Part 1 Vehicles Tax Act and Fees are collected. Under this the revenue collected in year 1992 is Rs.20,824,55 and this amount in year 1993 reached up-to Rs 22,436.00, above figures suggests that there is remarkable increase in the revenue collection under this head.

Under Part 2 come various types of fees :

1. Registration Fee : Under this head the fees collected in year 1992 is Rs.547.22 (lakhs) and comparatively the amount has gone upto Rs.602.18 in year 1993.

2. License Fee : In year 1992 the amount was Rs.243.32 and in presiding year is Rs.258.60. It shows there is an increase in license fee collection.

3. Permit Fee : Under this head the amount is increased by 6.5 lakhs in year 1993 compare to year 1992.

4. Public Carrier Permit Fee : In this case there is increase in the amount of revenue.

5. Taxi Permit Fee : In year 1992 the figure shows that Rs.107.46 and subsequently there is quiet increase in this amount also.

6. Settlement Amount : The amount here charged for settling the the case and to endof the case with fixing some amount.

7. Part 3 (Covers Public Carrier and Passenger)

- Old recovery : the old recovery done in year 1993 was

0.09 and in year 1993 it is reduced to 0.65.

- Passenger Tax : There is improvement in recovery of Passenger tax. In year 1992 was Rs.19,039.44 and in year 1993 it goes up-to Rs.20,141.17.

In brief from above table it is found that there is continuous increase in the collection revenue under above said various heads.

The graph plotted for this report shows the revenue is collected under Vehicle Tax and Act head is comparatively high among all heads and the second one Other Fee and Passenger Tax.

Graph For Districwise Revenue

Year v/s Revenue

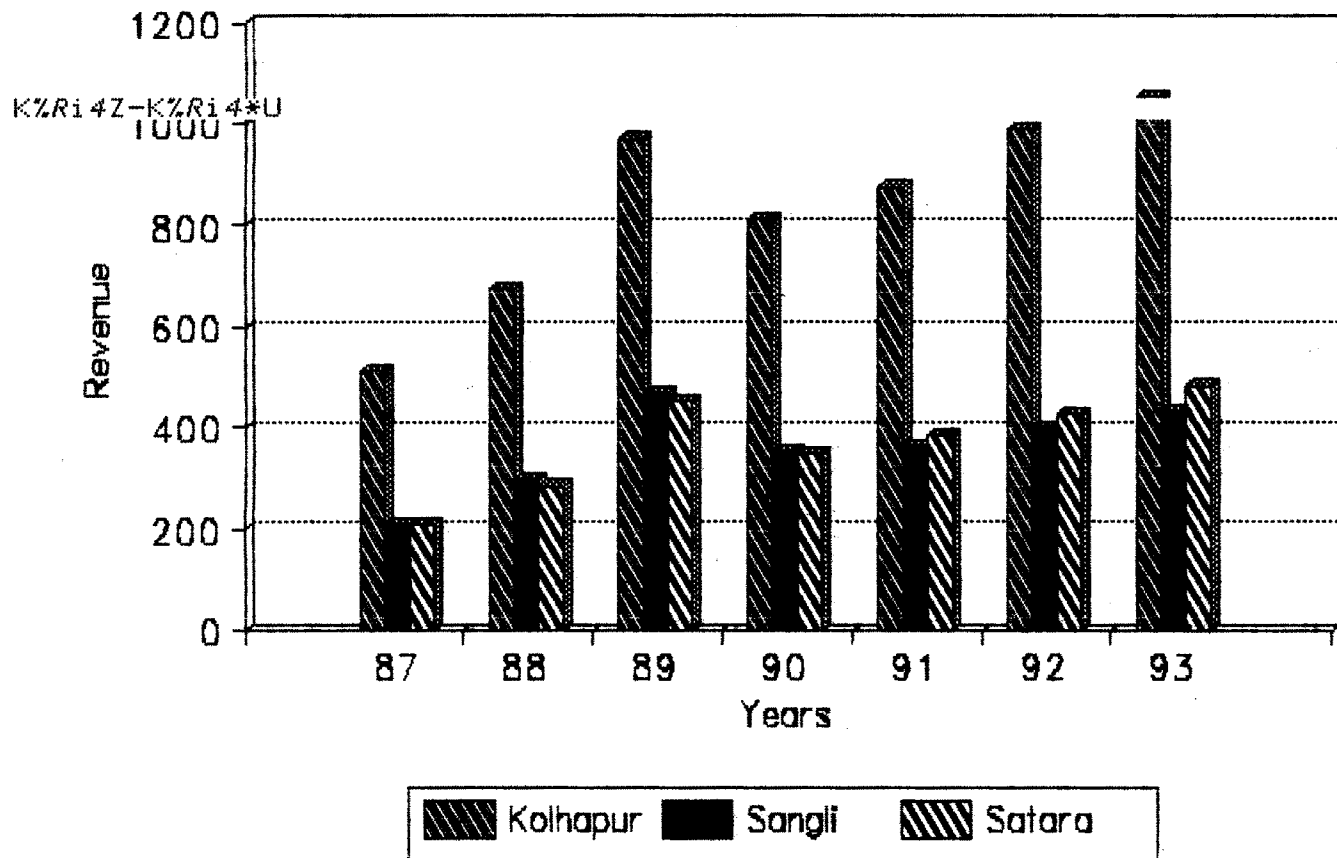

Table 2.

The above table shows the Districtwise revenue collection.

The revenue collection of Kolhapur District in the year 1992 shows Rs.987.18 and in year 1993 it reaches up-to Rs.1050.22.

The comparison of both years revenue is done then it shows that there is 13.80 % increase in revenue collection.

In other case if revenue amount of Kolhapur district is compared with that of other districts of Kolhapur Region then it is found that the Kolhapur's revenue is more. The revenue figure of Kolhapur district in year 1993 is Rs.1050.22 and that of Sangli district is Rs.430.20 and Satara is Rs.480.10 respectively. In all it is observed that Kolhapur is highest collector of revenue at Kolhapur Region.

The graph is plotted using 'Bar' graph facility of Qpro and it shows that there is increase in the revenue collection of Kolhapur district.

Graph For Squad Operations

District v/s Squad Revenue

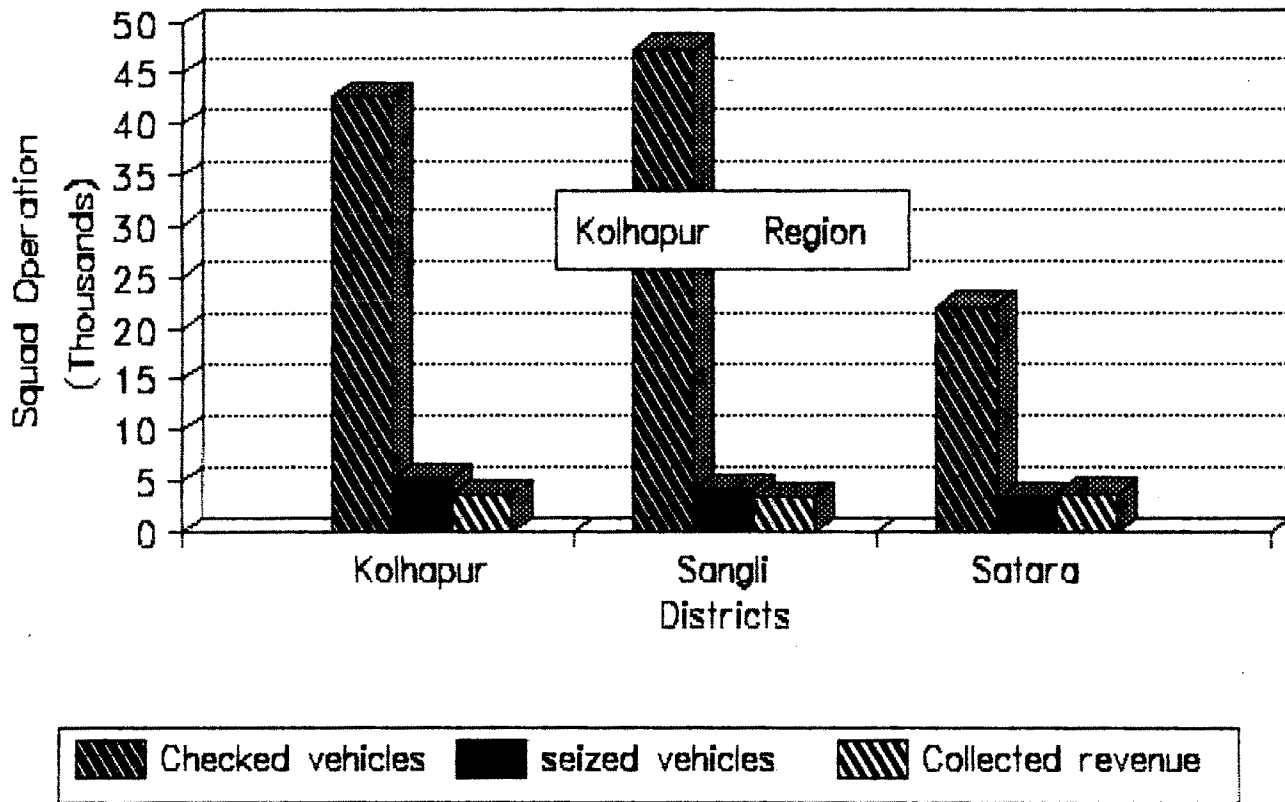

Table 3.

In above table the progress of the Flying Squad is observed in respect to number of checked vehicles, the number of seized vehicles and the fine collected from them. The number of checked vehicles in year 1992 was 38085 and in year 1993 it is 42580. The number of seized vehicles in year is 1993 it is 5237. So it shows there is measurable improvement in the work of Flying Squads. if the amount recovered is considered in year 1992 was Rs. 3,065 and in year 1993 is Rs.3,549(thousands).

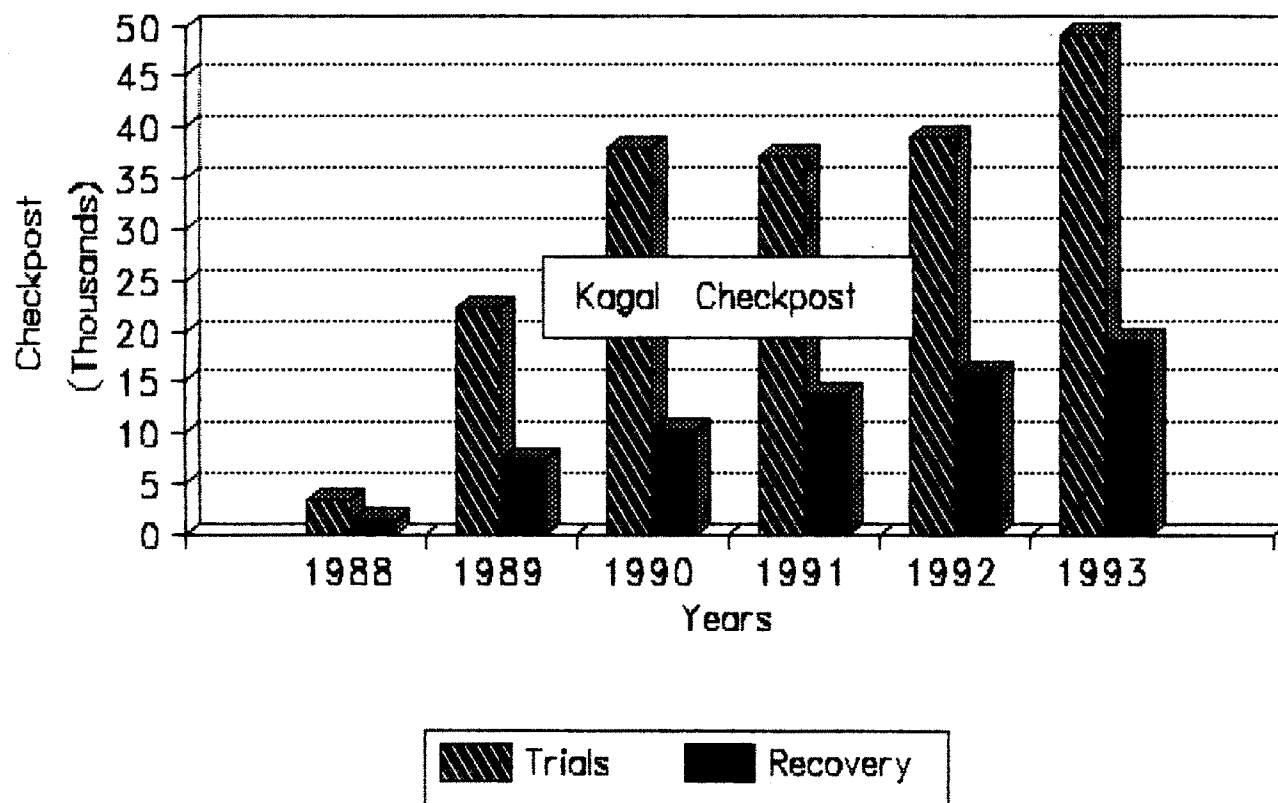

The number of seized vehicles is also considerably increased. The revenue collected by the Kolhapur district is compared with that of Sangli district and satara district then it is found that Kolhapur is at the second place. The Satara district has recovered revenue of Rs.3,718. The graph is plotted with appropriate scales (District v/s Squad operations) the work of Kolhapur Region squad is quite progressive. It is found that the number of checked vehicles is increased remarkably.
