

## 6.2. Suggesions :-

Computerisation of Motor Vehicles Tax collection reduce the time and gives accurate results.

If the R.T.O. department implements the present system which helps them to generate the reports regarding

- the total number of Private and Public vehicles
- the total revenue collected by the Kolhapur district
- the total revenue collected under various heads
- the revenue recovered by the flying squad etc.

The following may be the possible suggestions :

1. The Regional Transport Office should Computerise the Motor Vehicles Tax Collection procedures, which helps them in getting reports as early as possible.
2. The Regional Transport Office should device new strategies for improvement of recovery of revenue.
3. They should take immediate action regarding avoidance of pollution spreading from vehicles.
4. In case of flying squad operations the number of checked vehicles is more but comparitively revenue collected is less so necessary measurements could be taken to improve the recovery of revenue.
