

P R E F A C E

This is my great pleasure to study industrial sickness - identification and Rehabilitation. Industrial sickness is a key economic issue of the day. Its increasing trend in all types of units is causing considerable concern. Locking up of the country's limited financial resources, wastage of capital assets, loss of production and increase in unemployment have been the major repercussions of industrial sickness.

The study is mainly based secondary data available on industrial sickness. It also makes extensive use of various facts and figures provided in the individual research studies. It focuses on the various aspects of growth, causes and consequences of industrial sickness.

It delights me to have a study on the revival of Kamani Tubes Ltd. as an Employee - owned Industrial Cooperative. The historic Supreme court approving the BIFR scheme for revival of Kamani Tubes Ltd. has generated considerable debate in all segments of business activity.

I express my deep sense of gratitude to my guide Dr. V.S. Patil for his incessant guidance and encouragement without which this study would not have seen the light of the day.
