

LIST OF TABLES

Chapter	Table	Title	Page
I	1.1	Measurement and position of centromere of somatic chromosomes in <u>P. incarnata</u>	22
II	2.1	Proportion of orcein banded chromosome length expressed as percentage of total chromosome length.	28
	2.2	Proportion of Trypsin-Orcein banded chromosome length expressed as percentage of total chromosome length.	35
	2.3	Proportion of Giemsa banded chromosome length expressed as percentage of total chromosome length.	41
III	3.1	Percentage of meiotic abnormalities in <u>P. incarnata</u>	50
	3.2	Chiasma frequency at Diplotene to Metaphase - I ( <u>P. incarnata</u> )	51
IV	4.1	Percentage of pollen grain germination in different sucrose concentrations in Kwack and Kim nutrient medium as observed in three different types of <u>P. incarnata</u> after 9.0 hours.	61
V	5.1	Table showing the morphological changes induced by colchicine (0.2% aq.) treatment in <u>P. incarnata</u> .	68
	5.2	Table showing the morphological changes due to the treatment of chemical mutagens, DES and MNNG.	77
