

LIST OF TABLES

	<u>Name of Table</u>	<u>Page No.</u>
1.1	Export of Diesel Oil Engines	6
1.2	Decadewise growth of diesel oil engine manufacturing units.	14
1.3	Capital, employment, production and export of diesel oil engine industry in Kolhapur.	16
2.1	Prices of raw material per tonne (In Rupees)	24
3.1	Sample of Units from Cluster B.	59
4.1	Organisational set up of diesel engine manufacturing units.	66
4.2	Educational status of entrepreneurs.	68
4.3	Details of machines owned by various organisationally classified units.	70
4.4	Details of machines owned by various educationally qualified entrepreneurs.	72
4.5	Number of units requiring casting.	74
4.6	Organisationwise Classification of raw material required per month.	75
4.7	Initial capital and capital at present (Organisationwise classification of Capital investment)	77
4.8	Educationwise classification of capital invested	79
4.9	Sources of Capital in Percentage.	80
4.10	Cost of production as related to various components of cost given in percentage.	82
4.11	Number of labourers employed according to organisation of unit.	86
4.12	Educationwise classification of different types of labourers employed.	88

4.13	Labour to machine ratio.	89
4.14	Market sale outlet by region.	95
4.15	Organisationwise classification of market sale by region.	96
4.16	Proportion of sale by different distribution channels.	98
4.17	Percentage to total sale directly and through agents and dealers.	100
4.18	Production of diesel oil engine.	101
4.19	Organisationwise classification of capacity utilisation.	103
4.20	Educationwise classification of capacity utilization.	104
4.21	Export of diesel engines by various companies (1988-89)	106
4.22	Organisationwise classification of future plans	107
4.23	Educationwise classification of future plans	109
4.24	Priorities of raw material problems.	111
4.25	Organisationwise classification of raw material problem.	113
4.26	Classification of problems of raw material on the basis of education of entrepreneur.	114
4.27	Priority Classification of financial problems	115
4.28	Organisationwise classification of financial problem.	116
4.29	Educationwise classification of financial problem	118
4.30	Organisationwise classification of labour problems	121
4.31	Classification of units on the basis of education of entrepreneur.	123
4.32	Table showing prorities in marketing problem	125

4.33	Organisationwise classification of units facing marketing problem.	126
4.34	Classification of units on the basis of education of producers facing marketing problem.	128
5.1	Organisationwise classification of units manufacturing components.	133
5.2	Educationwise classification of entrepreneurs in different organisations in cluster B.	134
5.3	Organisationwise classification of machines.	136
5.4	Educationwise classification of machine	138
5.5	Organisationwise classification of raw material requirement per month.	140
5.6	Educationwise classification of raw material requirement per month	142
5.7	Initial capital and capital at present organisationwise classification of capital investment.	143
5.8	Educationwise classification of capital investment	146
5.9	Sources of capital in percentages	147
5.10	Cost of production as related to various components of cost given in percentages	150
5.11	Organisationwise classification of total number of labourers employed	152
5.12	Educationwise classification of labourers employed	154
5.13	Labour to machine ratio	155
5.14	Classification of units giving wages to different type of labour.	157
5.15	Organisationwise classification of distribution of sale through various channels.	161
5.16	Regionwise classification of sale of components	163

5.17	Export of diesel engine components by various units.	166
5.18	Capacity utilization in units in Cluster B.	167
5.19	Organisationwise classification of capacity utilization.	168
5.20	Organisationwise classification of future plans	170
5.21	Table showing intensity of the problem of raw material	172
5.22	Organisationwise classification of units facing problem of raw material	174
5.23	Classification of raw material problem faced by different producers at different educational level.	175
5.24	Table showing priorities of financial problem	177
5.25	Organisationwise classification of units facing financial problem	178
5.26	Educationwise classification of producers facing the problem of finance	180
5.27	Classification of problems in marketing by priority	181
5.28	Organisationwise classification of marketing problem	183
5.29	Classification of marketing problem on the basis of education of entrepreneurs.	184
5.30	Labour problem as classified by priority	186
5.31	Organisationwise classification of units facing labour problem	187
5.32	Educationwise classification of producers facing labour problem.	188
6.1	Growth of units in both clusters.	188
6.2	Labour machine ratio	199
6.3	Capacity utilization in both clusters.	200
