CHAPTER	TITLE	PAGE
	INTRODUCTION	1 - 5
I	REVIEW OF LITERATURE	6 - 30
	1.1 Weed research in India	
	1.2 Autecology of weed	
	1.3 Seed attributes	
	1.4 Leaf architecture	
	1.5 Stomatal studies	
	1.6 Nitrogen metabolism	
	1.7 Seasonal variations in physico-chemical constituents	
	1.8 Pathophysiology	
	1.9 Genus <u>Euphorbia</u>	
II	MATERIALS AND METHODS	31 - 44
	2.1 Material	
	2.2 Methods	
	2.2.1 General information	
	2.2.2 Field studies	
	2.2.3 Seed attributes	
	2.2.4 Leaf architecture and organic constituents	
	2.2.5 Stomatal studies	
	2.2.6 Nitrogen metabolism	
	2.2.7 Seasonal variations in physico-chemical constituents	
	2.2.8 Pathophysiology	

CHAPTER	TITLE	PAGE
III	RESULTS AND DISCUSSION	45 - 102
3.1	Geographical distribution of <u>E. geniculata</u>	45
3.2	Field studies	45
3.2.1	Habitat	
3.2.2	Morphology	
3.2.3	Pollination mechanism	
3.2.4	Multiplication	
3.2.5	Dehiscence and dispersal mechanism	
3.2.6	Phenology and life cycle	
3.2.7	Growth performance	
3.2.8	Phytosociological studies	
3.3	Seed attributes	58
3.3.1	Effect of moisture on seed coat	
3.3.2	Seed vigor	
3.3.3	Effect of dry storage on germination	
3.3.4	Ecological amplitude	
3.4	Leaf study	65
3.4.1	Leaf architecture	
3.4.2	Organic constituents	
3.4.3	Stomatal studies	
3.5	Nitrogen metabolism	76
3.5.1	Total nitrogen, proteins and key enzymes	
3.5.2	Salt stress and enzymes of nitrogen metabolism	
3.6	Seasonal variations in Physico-chemical constituents	82
3.6.1	Organic constituents	
3.6.2	Inorganic constituents	
3.7	Pathophysiology	93
3.7.1	Effect of <u>Melampsora</u> infection on organic constituents	
3.7.2	Effect of <u>Melampsora</u> infection on inorganic constituents
