

LIST OF TABLES

TABLE	TITLE	PAGE
1	Effect of dry storage on germination percentage of seeds in <u>E. geniculata</u>	51
2	Growth performance of <u>E. geniculata</u> under natural drought/full light and moist/shade habitats	54
3	Phytosociological observations on <u>E. geniculata</u> , under two different habitats - i) full light ii) under tree shade	57
4	Seed attributes in natural populations of <u>E. geniculata</u>	59
5	Estimation of seed vigor of <u>E. geniculata</u>	63
6	Dimension of leaf section of <u>E. geniculata</u>	68
7a	Organic constituents in the leaves of <u>E. geniculata</u>	70
7b	Diurnal variation in acidity status (TAN) of leaves of <u>E. geniculata</u>	71
8	Stomatal frequency in the leaves of <u>E. geniculata</u>	73
9	Diurnal variation in stomatal behaviour of opposite and alternate leaves of <u>E. geniculata</u>	75
10	Nitrogen metabolism in <u>E. geniculata</u>	78
11	Seasonal variations in moisture % and dry matter from <u>E. geniculata</u>	83
12	Seasonal variations in physico-organic constituents of leaves of <u>E. geniculata</u>	85
13	Seasonal variations in inorganic constituents of root, stem, leaf of <u>E. geniculata</u>	92
14	Effect of <u>Melampsora</u> infection on organic constituents of leaves of <u>E. geniculata</u>	95
15	Effect of <u>Melampsora</u> infection on inorganic constituents of leaves of <u>E. geniculata</u>	99
