

List of Figures

<u>Figure No.</u>	<u>Title</u>	<u>Page</u>
1	Pesticide cycling in the environment	... 7
2	Effect of different concentrations of methylparathion on leaf area expansion in tomato, okra and guar	... 45
3	Effect of different concentrations of phosphamidon on leaf area expansion in tomato, okra and guar.	... 46
4	Effect of different concentrations of methylparathion and phosphamidon on diffusive resistance (DR) for water and transpiration rate (TR) in <u>Lycopersicon esculentum</u> leaves.	... 53
5	Effect of different concentrations of phosphamidon on polyphenol content in the leaves of tomato, okra and guar.	... 69
6	Effect of different concentrations of methylparathion on polyphenol content in the leaves of tomato, okra and guar.	... 70
7	Effect of different concentrations of phosphamidon and methylparathion on Na ⁺ content in the leaves of tomato, okra and guar.	... 79
8		
...	Effect of different concentrations of phosphamidon and methylparathion on K ⁺ content in the leaves of tomato, okra and guar.	... 81
	

<u>Figure No.</u>	<u>Title</u>	<u>Page</u>
9	Effect of different concentrations of phosphamidon and methylparathion on Ca^{2+} content in the leaves of tomato, okra and guar.	84
10	Effect of different concentrations of phosphamidon and methylparathion on Mg^{2+} content in the leaves of tomato, okra and guar.	88
11	Effect of different concentrations of phosphamidon and methylparathion on Fe^{2+} content in the leaves of tomato, okra and guar.	91
12	Effect of different concentrations of phosphamidon and methylparathion on Mn^{2+} content in the leaves of tomato, okra and guar.	93
13	Effect of different concentrations of phosphamidon and methylparathion on Zn^{2+} content in the leaves of tomato, okra and guar.	95
14	Effect of different concentrations of phosphamidon and methylparathion on Cu^{2+} content in the leaves of tomato, okra and guar.	97
15	Representation of paper chromatogram of phosphamidon separated on Whatman No.1 chromatogram (1 h. after spray).	99
16	Representation of paper chromatogram of phosphamidon separated on Whatman No.1 chromatogram (7th day after spraying)	100
