

IV

LIST OF TABLES

Chapter No.	Table No.	Title	Page No.
I	1	Water deficit stress and proline accumulation	19
	2	Salinity stress and proline accumulation	27
III	3	Total nitrogen and free proline	57
	4	Relationship between leaf moisture percentage and free proline levels in three plant species.	75
	5	Relationship between leaf Ca ⁺⁺ and K ⁺ status and free proline levels in three plant species.	81
	6	Relationship between leaf total sugar status and free proline levels in three plant species.	91
	7	Relationship between free proline level and mean transpiration rate in leaves of three plant species.	99
	8	Relationship between free proline accumulation and <u>in vivo</u> nitrate reductase activity in leaves of watered and water stressed plant species.	107
