

LIST OF FIGURES

FIGURE	DESCRIPTION	AFTER	PAGE
I. 1	Sorghum hybrid CSH-9 in the field.	...	57
I. 2	Sorghum var. SPV-462 in the field.	...	57
I. 3	Comparative morphology of sorghum hybrid CSH-9 and var. SPV-462.	...	58
I. 4	Ear head of sorghum hybrid CSH-9 and var. SPV-462.	...	58
III. 1A	Growth and development of sorghum hybrid CSH-9 seedlings (120h) under NaCl salinity.	...	66
III. 1B	Growth and development of sorghum var. SPV-462 seedlings (120h) under NaCl salinity.	...	66
III. 2A	Growth and development of sorghum hybrid CSH-9 seedlings (120h) under Na ₂ SO ₄ salinity.	...	68
III. 2B	Growth and development of sorghum var.SPV-462 seedlings (120h) under Na ₂ SO ₄ salinity.	...	68
III. 3	Effect of NaCl salinity on germination percentage in sorghum hybrid CSH-9 seeds...		66
III. 4	Effect of NaCl treatment on germination percentage in sorghum var.SPV-462 seeds....		66
III. 5	Effect of Na ₂ SO ₄ salinity on germination percentage in sorghum hybrid CSH-9 seeds...		68

FIGURE	DESCRIPTION	AFTER	PAGE
III. 6	Effect of Na_2SO_4 salinity on germination percentage in sorghum var. SPV-462 seeds.	...	68
III. 7	Effect of NaCl salinity on total length and fresh wt of sorghum hybrid CSH-9 and var.SPV-462 seedlings after 120 hours of germination.	...	76
III. 8	Effect of Na_2SO_4 salinity on total length and fresh wt of sorghum hybrid CSH-9 and var.SPV-462 seedlings after 120 hours of germination.	...	79
III. 9	Effect of NaCl salinity on shoot and root growth in sorghum hybrid CSH-9 and var.SPV-462 seedlings after 120 hours of germination.	...	79
III. 10	Effect of Na_2SO_4 salinity on shoot and root growth in sorghum hybrid CSH-9 and var.SPV-462 seedlings after 120 hours of germination.	...	80
III. 11	Effect of NaCl salinity on shoot and root growth in sorghum hybrid CSH-9 seedlings after 120 hours of germination.	...	80

FIGURE	DESCRIPTION	AFTER PAGE
III. 12	Effect of NaCl salinity on shoot and root growth in sorghum var.SPV-462 seedlings after 120 hours of germination. ...	80
III. 13	Effect of Na ₂ SO ₄ salinity on shoot and root growth in sorghum hybrid CSH-9 seedlings after 120 hours of germination. ...	80
III. 14	Effect of Na ₂ SO ₄ salinity on shoot and root growth in sorghum var.SPV-462 seedlings after 120 hours of germination. ...	80
III. 15	Effect of NaCl salinity on protein content in CSH-9 and SPV-462 seedlings after 120 hours of germination. ...	113
III. 16	Effect of Na ₂ SO ₄ salinity on protein content in CSH-9 and SPV-462 seedlings after 120 hours of germination. ...	113
III. 17	Effect of NaCl salinity on starch content in sorghum hybrid CSH-9 seedlings after 120 hours of germination. ...	115
III. 18	Effect of NaCl salinity on total sugars in sorghum hybrid CSH-9 seedlings after 120 hours of germination. ...	115
III. 19	Effect of NaCl salinity on starch content in sorghum var.SPV-462 seedlings after 120 hours of germination. ...	118

FIGURE	DESCRIPTION	AFTER PAGE
III. 20	Effect of NaCl salinity on total sugars in sorghum var. SPV-462 seedlings after 120 hours of germination.	... 118
III. 21	Effect of Na ₂ SO ₄ salinity on starch content in sorghum hybrid CSH-9 seedlings after 120 hours of germination...	121
III. 22	Effect of Na ₂ SO ₄ salinity on total sugars in sorghum hybrid CSH-9 seedlings after 120 hours of germination.	... 121
III. 23	Effect of Na ₂ SO ₄ salinity on starch content in sorghum var. SPV-462 seedlings after 120 hours of germination.	... 123
III. 24	Effect of Na ₂ SO ₄ salinity on total sugars in sorghum var. SPV-462 seedlings after 120 hours of germination.	... 123
