

LIST OF FIGURES

| Figure No. | Title | After page |
|---------------|--|---------------|
| 1 | Simplified theoretical structural model of spinach nitrate reductase. | 33 |
| 2 | An illustration of various donors of electrons to and acceptors of electrons from NR and the proposed, internal electron transport path. | 35 |
| 3 | Entire plant of <u>Crotalaria juncea</u> . | 59 |
| 4 | Different species of <u>Crotalaria</u> | 77 |
| 5 | Nitrate reductase activity in leaves of <u>Crotalaria juncea</u> during different stages of growth. | 84 |
| 6 | Nitrate reductase activity in leaves and stem of <u>Crotalaria juncea</u> during different hours of the day. | 90 |
| 7 | Effect of GA on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> seedling. | 105 |
| 8 | Effect of IAA on <u>in vivo</u> nitrate reductase activity. in <u>Crotalaria juncea</u> seedlings. | 106 |
| 9 | Effect of ascorbic acid on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> seedlings. | 108 |
| 10 | Effect of CCC on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> seedlings. | 109 |
| 11 | Effect of etherel on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> seedlings. | 110 |
| 12 | Effect of PEG induced water stress on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> . | 112 |
| 13 | Effect of chlorides salts on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> seedlings. | 115 |

| Figure No. | Title | After page |
|------------|---|------------|
| 14 | Effect of sodium sulphate and sodium carbonate on <u>in vivo</u> nitrate reductase activity in <u>Crotalaria juncea</u> seedlings. | 115 |
| 15 | Effect of presowing soaking treatment on <u>in vivo</u> nitrate reductase activity in germinating seeds of <u>Crotalaria juncea</u> . | 121 |
