

C O N T E N T S

CHAPTER	TITLE	PAGE
	INTRODUCTION	1
I	REVIEW OF LITERATURE ON <u>CROTALARIA</u>	4
	1. Distribution	4
	2. Cultivation	4
	3. Harvesting	5
	4. Economic importance	5
	5. Morphology	7
	6. Cytological studies	13
	a. Chromosome number	13
	b. Karyotypic studies	13
	c. Basic number	15
	d. Meiotic studies	15
	e. Polyploidy	16
	7. Physiological Studies	17
	a. Germination	17
	b. Nitrogen metabolism	22
	c. Nitrate reductase	25

CHAPTER	TITLE	PAGE
	8. Pollen germination	34
	9. Research work to be done	34
II	MATERIALS AND METHODS	36
	1. Materials	36
	2. Methods	36
	I Cytological studies	36
	a. Karyotypic studies	36
	b. Meiotic studies	39
	c. Pollen fertility	40
	II Growth	40
	III Physiological studies	41
	i) Estimation of total nitrogen and crude proteins.	41
	ii) Nitrate content	43
	iii) Nitrate reductase (E.C. 1.6.6.1)	43

CHAPTER	TITLE	PAGE
III	RESULTS AND DISCUSSION	45
	A. Karyotype, Meiosis and Pollen fertility in <u>Crotalaria</u> species.	45
	B. Growth	56
	C. Total Nitrogen and Crude Protein	73
	D. Nitrate Content and Nitrate Reductase	78
IV	SUMMARY AND CONCLUSIONS	86
	BIBLIOGRAPHY	91
	STATEMENT I	110
	STATEMENT II	111
