

LIST OF TABLES

Table	Title	Page
1	Surviving forest area of the World	12
2	Maharashtra Forest area ...	21 - 22
3	Common plants in Maharashtra ...	26 - 34
4	Ten major species of the genus <u>Leucaena</u> .	40
5-A	Details of the Giant types of Soo-babul.	42
5-B	Forest tree seed collection period and their viability. ...	50 - 51
6	Seed weight and plant germination percentage of some indigenous and exotic species and the pretreatment needed. ...	98 - 100
7	Effect of presowing soaking treatments of water, H ₂ SO ₄ and ascorbic acid on germination of some forest trees. ...	101
8	Effect of presowing soaking treatments on germination and growth of seedlings of <u>L.leucocephala</u> varieties (field experiment)	105 - 106
9	Effect of presowing soaking treatments on germination and growth of seedlings of <u>L.leucocephala</u> varieties (Experiment of polythene bags) ...	107 - 108
10	Effect of presowing soaking treatments on germination and growth of seedlings of <u>L.leucocephala</u> varieties (Laboratory experiment). ...	111 - 112
11	Effect of some salts, thiourea, ascorbic acid and polyethylene glycol on germination of seeds of <u>L.leucocephala</u> varieties (Laboratory experiment). ...	114 - 115

....

Table	Title	Page No.
12	Effect of some salts, thiourea, ascorbic acid and polyethylene glycol on the growth and development of <u>L.leucocephala</u> Variety Local (After 3 weeks of germination)	116 - 117
13	-do- -do- Variety K8 (After 3 weeks of germination)	118 - 119
14	-do- -do- Variety K28 (After 3 weeks of germination).	120 - 121
15	Effect of some salts, thiourea, ascorbic acid and polyethylene glycol on carbohydrate contents of germinating seeds of <u>L.leucocephala</u> Varieties Local, K8, K28 (After 3 weeks of germination). ...	127 - 128
16	Effect of some salts, thiourea ascorbic acid and polyethylene glycol on proline content of germinating seeds of <u>L.leucocephala</u> Varieties Local, K8 and K28 (After 3 weeks of germination)	130
17	Effect of some salts, thiourea ascorbic acid and polyethylene glycol on the amino acid composition of germinating seeds of <u>Leucaena</u> varieties Local. (After 3 weeks of germination)	134
18	-do- -do- Var. K8	135
19	-do- -do- Var. K28	136
20	Effect of some salts, thiourea ascorbic acid polyethylene glycol on sugar composition of germinating seeds of <u>Leucaena leucocephala</u> Variety - Local (After 3 weeks of germination)	139
21	-do- -do- Var. K8	140
22	-do- -do- Var. K28	141
