

Preface

After industrial revolution man started exploiting environment and its resources blindly to fulfill his increased level of consumption which has disturbed the environment very seriously. Now the time has come to stop mistakes and think carefully for eco-friendly existence. We have now realized that better understanding of environment can only be achieved through environment education. That's why environment education has become an integral part of general education.

The present study highlights the current situation of environment education in various professional education course. It is important to study how environment education has been introduced in various professional educational courses because every profession is either directly or indirectly related with environment. If the future professionals are deeply enlightened with the knowledge and understanding of Environment and its conservation, there are better hopes for better environment.
