

## *List of Tables*

Table No.	Title
2.1	Thermistors Resistance Variation with temperature.
2.2	Specifications of IC 555 <sup>(6)</sup>
2.3	Comparision of Conventional and Fuzzy Design routes
3.1	Universe of discourse for input and output of the fuzzy logic controller
3.2	Fuzzy Variable for Temperature
3.3	Fuzzy Variable for temperature sense :
3.4	Fuzzy Variable ranges for output % Duty Cycle.
3.5	Temperature and Corresponding Hex Count
3.6	Percentage Duty Cycle and corresponding Hex Count
3.7	Duty Cycle and Defuzzified Hex Count for PWM
3.8	Duty Cycle and Defuzzified Hex Count for PWM
3.9	Duty Cycle and Defuzzified Hex Count for PWM
3.10	Duty Cycle and Defuzzified Hex Count for PWM
3.11	Duty cycle & steady state temperature (set point 80 <sup>0</sup> C)
3.12	Duty cycle & steady state temperature (set point 50 <sup>0</sup> C)
