CHAPTER NO.	TITLE	PAGE NO.
I	<u>INTRODUCTION AND SURVEY</u>	1 to 21
	1.1 Introduction.	1
	1.2 Overview of literature.	2
	1.3 Concept of filter circuit. and its classification.	8
	1.4 Basic Theory of Active filters.	18
	1.5 Advantages of Active filters.	19
II	<u>FILTER THEORY</u>	22 to 72
	2.1 Basic idea of filters.	22
	2.2 Characteristics and orders of filters.	23
	2.3 Coupling of filters.	34
	2.4 Sensitivity.	35
	2.5 Filter Approximations.	41
	2.5 (A) Butterworth Approximation.	44
	(B) CHEYBYSHEV Approximation.	49
	(C) Elliptic Approximation.	52
	(D) Bessels Approximation.	54
	2.6 State Variable Analysis.	58
	2.7 State Variable filter.	61
	2.8 Filter Topology.	65
	2.9 Negative Feedback Theory.	66
	2.10 Positive Feedback Topology.	68
	2.11 Frequency Scaling and Impedance.	70

CHAPTER NO.	TITLE	PAGE NO.
III	<u>SENSITIVITY.</u>	73 to 85
	3.1 Introduction.	73
	3.2 W and Q Sensitivity.	74
	3.3 Multi-Element deviations.	77
	3.4 Gain Sensitivity.	79
	3.5 Factors affecting gain sensitivity.	83
IV	<u>STUDY OF A NEW ACTIVE-R FILTER CIRCUIT.</u>	86 to 92
	4.1 Introduction.	86
	4.2 Circuit Diagram.	87
	4.3 Circuit Analysis.	89
	4.4 Design Consideration.	91
	4.5 Sensitivity Consideration.	93
V	<u>STUDY OF RESPONSE OF THE CIRCUIT WITH VARIATION OF CENTRE FREQUENCY 'Fo'.</u>	95 to 103
	5.1 Circuit and Experimental Study.	95
	5.2 Results and Discussion.	96
VI	<u>STUDY OF RESPONSE OF THE CIRCUIT WITH VARIATION OF TAPPING POINT 'A'.</u>	104 to 115
	6.1 Introduction.	104
	6.2 Design Consideration.	105
	6.3 Results and Discussion.	107
	6.4 Conclusion.	114

---

CHAPTER NO.	TITLE	PAGE NO.
VII	<u>STUDY OF RESPONSE OF CIRCUIT WITH VARIATION OF 'Q'.</u>	116 to 124
7.1	Circuit and Experimental Study.	116
7.2	Results and Discussion.	121
7.3	Conclusion.	123
VIII	<u>SUMMARY AND CONCLUSIONS.</u>	125 to 130
8.1	Summary.	125
8.2	Conclusions.	129
	<u>REFERENCES.</u>	131 to 149
