LIST OF FIGURES

| ffect of presowing soaking treatment of rowth regulators on enzyme activities in buds of sugarcane var.CO.671 ffect of presowing soaking treatment of rowth regulators on germination percenage of sugarcane var.CO.671 | 57 75 |
|--|---|
| rowth regulators on germination percen- | 75 |
| THE CAMERICAL THE TOUTH | |
| ffect of presowing soaking treatment of rowth regulators on the average root ength and average fresh weight of nodal oots in sugarcane var.CO.671 | 81 |
| ffect of presowing soaking treatment of rowth regulators on leaf area of 4th eaf and leaf thickness in sugarcane ar.CO.671 | 82 |
| ffect of presowing soaking treatment of rowth regulators on average tiller umber, average internodal length and verage cane diameter of sugarcane var. 0.671 | 83 |
| ffect of presowing soaking treatment of rowth regulators on average internodal umber per cane and average milleable ane height of sugarcane var. CO.671. | 84 |
| ffect of presowing soaking treatment of rowth regulators on percentage brix alue and average cane weight of sugarane weight of sugarane war. CO.671 | 8 5 |
| | cowth regulators on the average root ength and average fresh weight of nodal cots in sugarcane var.CO.671 Effect of presowing soaking treatment of cowth regulators on leaf area of 4th eaf and leaf thickness in sugarcane er.CO.671 Effect of presowing soaking treatment of cowth regulators on average tiller ember, average internodal length and verage cane diameter of sugarcane var. O.671 Effect of presowing soaking treatment of cowth regulators on average internodal ember per cane and average milleable ane height of sugarcane var. CO.671. Effect of presowing soaking treatment of cowth regulators on percentage brix alue and average cane weight of sugar- |
