

LIST OF FIGURES

FIGURE NO.		PAGE NO.
1	Effect of presowing and soaking treatments on water uptake and respiration rate in germinating soybean seeds	78
2	Effect of presowing and soaking treatments on activities of α -amylase and lipase in germinating soybean seeds	85
3	Effect of presowing and soaking treatments on activities of acid phosphatase and phytase in germinating soybean seeds	95
4	Effect of presowing and soaking treatments on activities of Nitrate reductase and dehydrogenase in germinating soybean seeds	106
5	Effect of presowing and soaking treatments on activities of peroxidase and catalase in germinating soybean seeds	116
6	Effect of presowing soaking treatments on soluble sugars contents in germinating soybean seeds	129
7	Effect of presowing soaking treatments on ascorbic acid, free proline and glutathione contents in germinating soybean seeds	132
