

LIST OF TABLES

TABLE	TITLE	PAGE
1.1	Chemical composition of pulses	49
2.1	Pod development in <u>C.cajan</u> and <u>P.tetragonolobus</u>	50
2.1	Moisture percentage in seed and pod cover of <u>C.cajan</u> & <u>P.tetragonolobus</u> during pod development	70
2.2	Accumulation of dry matter in <u>P.tetragonolobus</u> seed	71
2.3	Total nitrogen in seed and pod cover of <u>C.cajan</u> and <u>P.tetragonolobus</u> during pod development	81
2.4	Changes in nitrogen constituents of different stages of seed development in winged bean on dry weight basis	82
2.5	Nitrate and nitrite reductase in seed and pod cover of <u>C.cajan</u> and <u>P.tetragonolobus</u> during pod development	89
2.6	Protein content in seed and pod cover of <u>C.cajan</u> and <u>P.tetragonolobus</u> during pod development	103
2.7	Distribution of protein fractions in different components of chickpea and pigeon pea	104
2.8	Proline content in seed and pod cover of <u>C.cajan</u> during pod development	112
2.9	Chlorophyll in seed and pod cover of <u>C.cajan</u>	117
2.10	Reducing sugars, total sugars and starch in seed and pod cover of <u>C.cajan</u> and <u>P.tetragonolobus</u> during pod development	127
2.11	Carbohydrates of food legumes.	128
2.12	α -amylase activity in seed and pod cover of <u>C.cajan</u> during pod development	132
2.13	Polyphenol in seed and pod cover of <u>C.cajan</u> during pod development	136
2.13	Changes in polyphenol content of Winged bean during seed maturation	136

contd.

LIST OF TABLES contd.

TABLE	TITLE	PAGE
2.14	Mineral composition of pods at different developmental stages in <u>C.cajan</u> seed and pod cover	143
2.15	Mineral composition of pods at different developmental stages in <u>P.tetragonolobus</u> seed and pod cover	144
2.16	Mineral content in food legumes	145
