

LIST OF TABLES

Sr. No.	Contents
1	Analysis of tannery wastewater
2	Chromium accumulation in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater
3	Protein content in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
4	Glycogen content in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
5	Lactic Acid contents in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
6	Cholesterol contents in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
7	Acid Phosphatase activity in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
8	Alkaline Phosphatase activity in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
9	Glutamate oxaloacetate transaminase activity in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
10	Glutamate pyruvate transaminase activity in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
11	ATPase activity in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
12	Lactate dehydrogenase activity in <i>Lamellidens marginalis</i> at different concentrations of tannery wastewater for different exposure periods
