

(iii)
LIST OF TABLES

TABLE	TITLE	PAGE
1	Survey of host plants infected with green alga <i>Cephaleuros</i> from Kolhapur region with disease intensity.	26
2	List of host plants infected with green alga <i>Cephaleuros</i>	33
3	Dry weight content in the leaves of various host plants infected with green alga <i>Cephaleuros parasiticus</i>	40
4	Stomatal regulation in healthy and cephaleuros (alga) infected leaves of three different hosts.	42
5	Chlorophyll content in the leaves of different host plants infected with green alga <i>Cephaleuros parasiticus</i> .	45
6	Carotenoid content in the leaves of different host plants infected with green alga <i>Cephaleuros parasiticus</i>	51
7	Nitrogen content in the leaves of various host plants infected with green alga <i>Cephaleuros parasiticus</i>	54
8	Polyphenol content in the leaves of various host plants infected with green alga <i>Cephaleuros parasiticus</i>	56
9	Sugar content in the leaves of various host plants infected with green alga <i>Cephaleuros parasiticus</i>	60
10	Mineral contents from the leaves of various host plants infected with green alga <i>Cephaleuros parasiticus</i>	65
11	Polyphenol oxidase and phenyl alanine ammonia lyase activity in the leaves of various host plants infected with green alga <i>Cephaleuros parasiticus</i>	73
12	Chromatographic separation of amino acids from the leaves infected with green alga <i>Cephaleuros parasiticus</i>	78
13	Chromatographic separation of organic acids from the leaves infected with green alga <i>Cephaleuros parasiticus</i>	79
14	Chromatographic separation of phenolic compounds from the leaves infected with green alga <i>Cephaleuros parasiticus</i>	82
