

(iv)

LIST OF FIGURES

FIGURE	TITLE	PAGE
1	Histogram showing chlorophyll content in healthy and alga infected leaf tissue of <i>Mangifera indica</i>	46
2	Histogram showing chlorophyll content in healthy and alga infected leaf tissue of <i>Michelia champaca</i>	47
3	Histogram showing chlorophyll content in healthy and alga infected leaf tissue of <i>Pothos scandens</i>	48
4	Histogram showing chlorophyll a/b ratio in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	49
5	Histogram showing carotenoids content in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	52
6	Histogram showing nitrogen content in healthy and alga infected leaf tissue of different host plants a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	55
7	Histogram showing polyphenol content in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	57
8	Histogram showing sugar content in healthy and alga infected leaf tissue of <i>Mangifera indica</i> .	61
9	Histogram showing sugar content in healthy and alga infected leaf tissue of <i>Michelia champaca</i> .	62
10	Histogram showing sugar content in healthy and alga infected leaf tissue of <i>Pothos scandens</i> .	63
11	Histogram showing mineral contents (Na^+ , K^+ , Ca^{2+} and Mg^{2+}) in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>pothos scandens</i>	67
	

List of Figures (contd..)

FIGURE	TITLE	PAGE
12	Histogram showing mineral contents (Mn^{2+} , P^{5+}) in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>pothos scandens</i>	69
13	Histogram showing mineral content (Fe^{3+}) in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	70
14	Histogram showing polyphenol oxidase activity in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	74
15	Histogram showing phenylalanine ammonia lyase activity in healthy and alga infected leaf tissue of different host plants. a) <i>Mangifera indica</i> b) <i>Michelia champaca</i> c) <i>Pothos scandens</i>	76

LIST OF PLATES

PLATE	TITLE	PAGE
I	Infection of parasitic alga <i>Cephaleuros parasiticus</i> on <i>Mangifera indica</i> , <i>Michelia champaca</i> .	27
II	Infection of parasitic alga <i>Cephaleuros parasiticus</i> on <i>Pothos scandens</i> .	28
III	Defoliation of <i>Michelia champaca</i> caused due to infection of parasitic alga <i>Cephaleuros parasiticus</i> .	29
IV	Infection of parasitic alga <i>Cephaleuros parasiticus</i> on <i>Nyctanthes arbortristis</i> and <i>Anacardium occidentale</i> .	30
V	Infection of parasitic alga <i>Cephaleuros parasiticus</i> on <i>Ficus benghalensis</i> and <i>Ficus religiosa</i> .	31
VI	Infection of parasitic alga <i>Cephaleuros parasiticus</i> on <i>Gardenia resinifera</i> and <i>Artocarpus incisus</i> .	32
VII	T.S. of host leaf showing prostrate and erect habit of parasitic alga <i>Cephaleuros parasiticus</i> along with zoosporangium.	37
VIII	T.S. of infected leaf by parasitic algae <i>Cephaleuros parasiticus</i> showing a rhizoidal filament into host cuticle.	38
IX	Chromatogram showing separation of amino acids (A) and organic acids (B) from healthy and alga infected leaf tissue.	80
X	Chromatogram showing separation of polyphenols from healthy and alga infected leaf tissue.	84
XI	Cultural study of parasitic alga <i>Cephaleuros parasiticus</i> .	86
XII	Culture of parasitic alga <i>Cephaleuros parasiticus</i> on Bold's basal medium.	88
XIII	Suppression of algal growth by using different concentrations of CuSO ₄ in Bold's basal medium.	89
