CHAPTER	TITLE	PAGE NO.
	INTRODUCTION	1
I	REVIEW OF LITERATURE	19
	A. DIRECT INJURY	22
	B. INDIRECT INJURY	24
	a) Solute leakage.	24
	b) Respiratory Upset.	25
	c) Toxins.	27
	d) Protein breakdown.	29
	e) Enzyme activity.	30
	f) Biological lesions.	31
	g) Photosynthesis.	33
	h) Protoplasmic streaming	33
	i) Stimulation of Ethylene production	35
	C. SECONDARY STRESS INJURY	36
	D. MECHANISM OF CHILLING INJURY	37
	a) Metabolic disturbances leading to indirect injury.	37
	i) Differences in energy of activation.	37
	ii) Membrane bound enzyme inactivation.	38
	b) Permeability changes.	41
	i) Increased permeability leading to direct injury.	41
	ii) Decreased permeability leading to secondary water stress injury.	42

CHAPTER	TITLE	PAGE NO.
	c) Mechanism of chilling injury	44
	i) Recently published hypothesis.	47
	ii) Chilling injury not associated with lipid phase transition.	49
E.	CHILLING SUSCEPTIBILITY	50
F.	CHILLING RESISTANCE	52
	a) Increased unsaturation of fatty acids.	53
	b) Other lipid factors.	55
	c) Soluble proteins.	56
G.	HORTICULTURAL MANIFESTATION	57
H.	ALLEVIATING CHILLING INJURY	60
	a) Manipulating the storage environment	61
	b) Hypobaric storage.	62
	c) Chemical treatment.	63
I	PLANTS UNDER INVESTIGATION	65
II	MATERIAL AND METHODS	
	A. MATERIAL	70
	B. METHODS	72
	a) Moisture.	72
	b) Photosynthetic pigments.	72
	i) Chlorophylls.	72
	ii) Carotenoids.	73
	iii) Absorption spectrum of photosynthetic pigments.	74
	c) Carbohydrates.	74

CHAPTER	TITLE	PAGE NO.
	d) Polyphenols.	77
	e) Soluble proteins.	78
	f) Proline.	79
	g) Nitrate.	80
	h) Ascorbic acid.	81
	i) Enzymes.	83
	i) Hydroxyperoxidases.	83
	1) Peroxidase.	83
	2) Catalase.	84
	ii) Nitrate reductase.	86

III RESULTS AND DISCUSSION

A.	Moisture.	88
B.	Photosynthetic pigments.	94
	a) Chlorophylls.	94
	b) Carotenoids.	103
	c) Absorption spectrum of photosynthetic pigments.	108
C.	Carbohydrates.	118
D.	Polyphenols.	128
E.	Soluble proteins.	134
F.	Proline.	142
G.	Nitrate.	150
H.	Ascorbic acid.	157
I.	Enzymes.	164
	a) Hydroxyperoxidases	165
	i) Peroxidase	166

CHAPTER	TITLE	PAGE NO.
	ii) Catalase.	172
	b) Nitrate reductase.	177
IV	SUMMARY AND CONCLUSIONS	188
	BIBLIOGRAPHY	206
