

V

List of Tables

No.	Title	Page
1.	Moisture percentage and dry matter content from mangrove seedlings	13
2.	Biomass and ash content of mangrove seedlings	17
3.	Sodium from different parts of mangrove seedlings	20
4.	Potassium from different parts of mangrove seedlings	26
5.	Sodium to Potassium ratio from different parts of mangrove seedlings	29
6.	Calcium from different parts of mangrove seedlings	32
7.	Magnesium from different parts of mangrove seedlings	35

8. Calcium and Magnesium extracted from ash of different parts of mangrove seedlings 36
9. Iron from different parts of mangrove seedlings 39
10. Chloride from different parts of mangrove seedlings 42
11. Distribution of ash and some mineral elements in the seedling of Avicennia officinalis 44
12. Distribution of ash and some mineral elements in the seedling of Aegiceras corniculatum 45
13. Distribution of ash and some mineral elements in the seedling of Acanthus ilicifolius 46
14. Distribution of ash and some mineral elements in the seedling of Sonneratia alba 47

15. Distribution of ash and some mineral elements in the seedling of Lumnitzera racemosa 48
16. Distribution of ash and some mineral elements in the seedling of Ceriops tagal 49
17. Distribution of ash and some mineral elements in the seedling of Rhizophora mucronata 50
18. Organs showing highest and lowest values for different elements and percentage difference between the two 51
19. Index values based on ecological model for different mangrove species 66
