	ACKNOWLEDGEMENT	
	CONTENTS	
	List of Plates	v
	List of Figures	vi
	Abbreviations	vii
	INTRODUCTION	1
I	REVIEW OF LITERATURE	6
	a. Distribution	6
	b. Botany	7
	c. Cytology	13
	d. Anatomy	13
	e. Diseases	14
	f. Economic importance	16
	g. Physiological studies	21
	1) Seed germination	21
	2) Growth	22
	3) Photosynthesis	23
	4) Transpiration	26

5) Nitrogen metabolism	26
6) Mineral nutrition	27
h. Salt tolerance studies in <i>Prosopis juliflora</i>	30
1) Introduction	30
2) Seed germination	31
3) Growth	32
4) Transpiration	32
5) Mineral nutrition	33
6) Metabolic adaptations	33
7) Nitrogen metabolism	34
II MATERIALS AND METHODS	35
A) Seed germination studies	35
B) Study of influence of sodium chloride salinity on metabolism	35
1) Sand culture	35
2) Mineral nutrition	36
a. Preparation of acid digestion	36
i) Sodium, Potassium and Calcium	37
ii) Phosphorus	37
iii) Chloride	38
3) Qualitative changes of lipid composition	39
4) Carbohydrate metabolism	40

	a. Enzyme Invertase	40
	b. Soluble proteins	41
	c. Enzyme α - amylase	42
	5) Phosphorus metabolism	43
	a. Enzyme Acid phosphatase	43
	b. Enzyme Alkaline phosphatase	43
	c. Enzyme ATPase	44
	d. Enzyme Alkaline inorganic pyrophosphatase	45
III	RESULTS AND DISCUSSION	47
	A) Seed germination studies	47
	B) Total fresh weight and dry weight	52
	C) Study of influence of sodium chloride salinity on metabolism	57
	1) Mineral nutrition	57
	i) Sodium and Chloride	57
	ii) Potassium	64
	iii) Calcium	67
	iv) Phosphorus	70
	3) Qualitative changes of lipid composition	73
	4) Carbohydrate metabolism	78

	a. Enzyme Invertase	78
	b. Enzyme α - amylase	81
	5) Phosphorus metabolism	85
	a. Enzyme Acid phosphatase	85
	b. Enzyme Alkaline phosphatase	90
	c. Enzyme ATPase	93
	d. Enzyme Alkaline inorganic pyrophosphatase	99
IV	SUMMARY AND CONCLUSIONS	103
	BIBLIOGRAPHY	107
	Statement – I	156
	Statement – II	157
