CHAPTER I	: INTRODUCTION AND GEOLOGY OF THE AREA	
	Introduction	1
	Purpose of Investigation	2
	Location	2
	Climate, Physiography and Drainage	3
	Previous Literature	5
	Geology of the Area	6
	Mineralisation	9
	Productive Granites	10
	Conclusions	16
CHAPTER II	: MATERIALS, METHODS AND ANALYTICAL DATA	
	Introduction	18
	Primary Environment	20
	Rock Sampling	20
	Secondary Environment	21
	Soil Sampling	21
	Lake Sediment Sampling	24
	Sample Preparation	24
	Sample Decomposition and Analytical Procedure	26
	Rock Decomposition	26
	Soil and Lake Sediment Decomposition	30
	Conclusions	44

	Page No.
CHAPTER III : LITHOGEOCHEMICAL SURVEY	
Introduction	45
Major Oxides	46
Trace Elements	56
Major Oxides in Conjunction with Trace Elements	63
Conclusions	72
CHAPTER IV : SOIL GEOCHEMICAL SURVEY	
Introduction	74
Association of Elements	75
Distribution of pH in Soils	80
Distribution of Elements in Soils	83
Dispersion Patterns of Iron and Manganese	84
Dispersion Patterns of Nickel, Chromium and Cobalt	87
Dispersion Patterns of Copper, Lead and Zinc	94
Dispersion Patterns of Molybdenum and Tungsten	100
Conclusions	104
CHAPTER V : LAKE SEDIMENT GEOCHEMICAL SURVEY	
Introduction	106
Association of Element in the Lake Sediments	108

	Page No.
Combination of Anomalous Distribution of the Elements	123
Distribution of Lake Chains in Koheda Area	125
Distribution of Cu, Zn, Co, Mo and W along the Lake Chains	127
Conclusions	134
CHAPTER VI : CONCLUSIONS AND THEIR IMPLICATIONS IN PROSPECTING	
Primary Environment	136
Secondary Environment	137
Soil Geochemical Survey	138
Lake Sediment Geochemical Survey	139
I BIBLIOGRAPHY	I - XVIII
