

## C O N T E N T S

| <u>Chapter</u> | TITLE   | <u>Page No.</u> |
|----------------|---|-----------------|
|                | Certificate of Guide  | I               |
|                | Acknowledgement   | II              |
|                | General Remarks   | III             |
|                | Synopsis  | IV              |
| CHAPTER-1      | A REVIEW ON THE APPLICATIONS OF<br>PHASE TRANSFER CATALYSTS IN<br>ORGANIC SYNTHESIS |                 |
|                | Introduction  | 1               |
|                | Mechanism of PT Catalysis   | 2               |
|                | Effect of Solvent   | 4               |
|                | Influence of Onium Cation   | 7               |
|                | Influence of the Anion  | 9               |
|                | Rate of Stirring  | 10              |
|                | Amount of Catalyst  | 11              |
|                | Different Types of Catalysts  | 12              |
|                | Advantages of PTC over Conventional<br>Procedure                                    | 26              |
|                | Survey of the Work on PT Catalysis  | 27              |
|                | References  | 31              |
| CHAPTER-2      | MONOALKYLATION OF MELDRUM'S ACID<br>UNDER PHASE TRANSFER CATALYZED<br>CONDITIONS    |                 |
|                | Abstract  | 38              |
|                | Introduction  | 38              |

.....

## CONTENTS (contd.)

| <u>Chapter</u> | TITLE  | <u>Page No.</u> |
|----------------|--|-----------------|
|                | Present Work   | 43              |
|                | Experiemntal   | 48              |
|                | Spectra  | 51              |
|                | References   | 57              |
| CHAPTER-3      | SYNTHESIS OF ARYLOXYACETIC ACID<br>ESTERS UNDER PHASE TRANSFER<br>CATALYZED CONDITIONS |                 |
|                | Abstract   | 60              |
|                | Introduction   | 60              |
|                | Present Work   | 66              |
|                | Experimental   | 70              |
|                | Spectra  | 72              |
|                | References   | 77              |
