PART I

<u>SECTION (A)</u> :	INTRODUCTION	1
<u>SECTION (B)</u> :	A RESUME' ON THE STRUCTURES OF THE RECENTLY INVESTIGATED GALACTOMANNANS OCCURRING IN THE SEEDS OF THE DIFFERENT PLANTS.	9
	(1) <i>Medicago sativa</i>	9
	(2) <i>Trifolium pratense</i>	10
	(3) <i>Trigonella foenum-graecum</i>	11
	(4) <i>Trifolium repens</i>	12
	(5) <i>Sesbania grandiflora</i>	14
	(6) <i>Cassia absus</i>	16
	(7) <i>Caesalpinia pulcherima</i>	18
	(8) <i>Crotalaria mucronata</i>	20
	(9) <i>Cassia fistula</i>	21
	(10) <i>Cassia occidentalis</i>	22
	(11) <i>Cassia grandis</i>	23
	(12) <i>Crotalaria juncea</i>	25
	(13) <i>Cassia multijuga</i>	27
	(14) <i>Ipomoea fistulosa</i>	28
	(15) <i>Sesbania speciosa</i>	30
	(16) <i>Sesbania aegyptiaca</i>	30
	(17) <i>Cassia renigera</i>	31
	(18) <i>Cassia corymbosa</i>	33
	(19) <i>Cassia laevigata</i>	35
	(20) <i>Teramnus labialis</i>	36
	(21) <i>Mellilotus indica</i>	37
	(22) <i>Indigofera tinctoria</i>	38
	(23) <i>Cassia sophera</i>	41

(24) Cassia alata	42
(25) Melilotus officinalis	44
(26) Crotalaria verrucosa	45
(27) Cassia siamea	46
(28) Sesbania bispinosa	47
(29) Ipomoea palmata	48
(30) Crotalaria medicaginea	49
(31) Cassia ovata	50

## PART II

<u>SECTION (A)</u> :	MORPHOLOGY OF THE PLANT <u>Adenantha pavonina</u> AND THE CHARACTERISTICS OF ITS CONSTITUENTS.	57
<u>SECTION (B)</u> :	CHEMICAL INVESTIGATIONS OF THE <u>Adenantha pavonina</u> SEED POLYSACCHARIDE	
<u>CHAPTER I</u>	ISOLATION AND PURIFICATION OF THE POLYSACCHARIDE OCCURRING IN THE SEEDS OF <u>A. pavonina</u>	59
	Homogeneity of <u>A. pavonina</u> Seed Polysaccharide	59
	(1) Paper Electrophoresis	61
	Preliminary Analysis of <u>A. pavonina</u> Seed Polysaccharide	61
<u>CHAPTER II</u>	HYDROLYTIC STUDIES WITH <u>Adenantha pavonina</u> SEED POLYSACCHARIDE	63
	Complete Acid Hydrolysis of <u>Adenantha pavonina</u> Seed Polysaccharide and Characte- risation of the Sugar Moieties	66

	Quantitative acid hydrolysis of <u>A. pavonina</u> seed polysaccharide and estimation of galactose and mannose ratio	66
<u>CHAPTER III</u>	GENERAL STRUCTURAL FEATURES OF <u>A. pavonina</u> SEED POLYSACCHARIDE	70
	Methylation Studies of <u>A. pavonina</u> Seed Polysaccharide	70
<u>REFERENCES</u>		90
<u>PART III</u>		
<u>SECTION (A) :</u>	GENERAL METHODS AND TECHNIQUES	94
	(1) Evaporation	94
	(2) Neutralisation	94
	(3) Optical Rotation	94
	(4) Sulphated Ash Determination	94
	(5) De-ionisation	95
	(6) Melting Point	95
	(7) Infrared Spectral Analysis	95
	(8) Nuclear Magnetic Resonance Spectral Analysis	95
	(9) Paper Electrophoresis	96
	(10) Chromatographic Techniques	96
	a) Paper Chromatography	96
	b) Column Chromatography	97
	c) Gas-Liquid Chromatography	97
	(11) Dialysis	97
	(12) Pentosan Estimation	97
	(13) Determination of Methoxyl content	99
	(14) Determination of Uronic Acid	100
	(15) Hydrolysis (Complete Hydrolysis)	102
	(16) Preparation of Alditol Acetate Derivatives	102
	(17) Mass Spectral Analysis	104
	(18) Determination of Sugar Ratio in the Polysaccharide	104

a) Periodate Oxidation Method	105
b) Phenol-Sulphuric Acid Method	105
Procedure for Drawing Calibration Curve for D-Galactose and D-Mannose	106
c) Gas Chromatographic Method	109
(19) Demethylation of O-Methylated Sugars	110

**SECTION (B) : EXPERIMENTAL**

Preliminary Analysis of the Seeds of <u>Adenantha pavonina</u>	111
(1) Moisture Content of the Seeds	111
(2) Ash Content of the Seeds	111
(3) Estimation of Proteinous Matter	111
(4) Oil Content of the Seeds	112
Isolation and Purification of the Polysaccharide Occurring in the Seeds of <u>Adenantha pavonina</u>	112
Homogeneity of <u>A. pavonina</u> Seed Polysaccharide	115
(1) Paper Electrophoresis	115
Infrared Spectral Analysis	115
Nuclear Magnetic Resonance Spectral Analysis	115
Sulphated Ash Content of the Polysaccharide	116
Complete Acid Hydrolysis of <u>A. pavonina</u> Seed Polysaccharide and Characterisation of the Cleavage Products	116
(1) Complete Acid Hydrolysis of the Polysaccharide with 2N Sulphuric Acid	116

Resolution of Neutral Sugar Mixture into its Components by Cellulose Column Chromatography	118
Characterisation of the Sugar Fractions from the Hydrolysate of the Polysaccharide by Classical Methods	119
Quantitative Estimation of the Sugars in <u>A. pavonina</u> Seed Polysaccharide ( by classical methods )	120
(1) Periodate Oxidation Method	121
(2) Phenol-Sulphuric Acid Method	121
Characterisation and Quantitative Estimation of the Sugars in <u>A. pavonina</u> Seed Polysaccharide by Gas-Chromato- graphic Method	122
Methylation of <u>Adenantha pavonina</u> Seed Polysaccharide	122
Hydrolysis of the Fully Methylated Polysaccharide	124
Examination of the Neutral Methylated Sugars Mixture	124
Resolution of Neutral Methylated Sugar Mixture by Preparative Partition Chromatography and Characterisation of the Components by Classical Methods	125
Resolution and Characterisation of Neutral Methylated Sugars by g.l.c.-m.s. Analysis of its Alditol Acetates	126
Quantitative Estimation of Neutral Methylated Sugars Present in the Mixture	127
(1) Gas-Chromatographic Method	127
