

LIST OF TABLES

Table		Page
1.1	A list of plant material investigated at research laboratories of India	5
1.2	Characterisation of neutral sugars (from the hydrolysate of the polysaccharide) by classical methods	67
1.3	Characterisation of sugars (as alditol acetates) from the hydrolysate of the polysaccharide by g.l.c. analysis under condition C <sub>1</sub> (OV-351)	68
1.4	G.l.c. analysis under condition C <sub>1</sub> (OV-351) of the alditol acetates derived from known sugars	68
1.5	Retention times of alditol acetates of partially methylated sugars on the g.l.c. column (3% OV-225)	74
1.6	Characterization of partially methylated neutral sugars (A <sub>1</sub> -A <sub>2</sub> ) by classical methods	78
1.7	G.l.c.-m.s. analysis of partially methylated alditol acetates (derived from methylated polysaccharide under condition C <sub>2</sub> (3% OV-225)	80
1.8	Absorbance values for D-galactose at different concentration	107
1.9	Absorbance values for D-mannose at different concentration	108
1.10	Progress of acid hydrolysis of the polysaccharide	117
1.11	Resolution of neutral sugar mixture by cellulose column chromatography	119
1.12	Estimation of galactose	121
1.13	Estimation of mannose	122
