

CONTENTS

		Pages
CHAPTER-I	INTRODUCTION	1 - 36
1:1	General Introduction ..	1
1:2	Historical Introduction ..	
1:2:1	General aspects of electro- luminescence	
	a) Preparation of electrolumi- nescent material ..	4
	b) Construction of an El.cell ..	5
	c) Measurement of El.intensity ..	8
	d) Factors affecting El.emission ..	9
	i-a) Voltage dependence ..	10
	i-b) Frequency dependence of El.emission ..	14
	ii) Effect of time on operation .. of El.cell	16
	iii) Temperature dependence ..	17
	iv) Effect of Magnetic field ..	19
	v) Effect of incident radiation .. on El.emission	19
1:2:2	Mechanism of Electroluminescence ..	
	I) Glow discharge mechanism ..	22
	II) Field ionization through acceleration mechanism ..	24
	III) Impact ionization ..	26
	IV) Injection of charge carriers ..	27
	V) Radiative recombination ..	28
1:2:3	Applications of Electroluminescence	32
CHAPTER-II	EXPERIMENTAL	37 - 47
2:1	Purification of organic compounds	37
2:2	Preparation of phosphors ..	40
2:3	Study of electro-optical properties ..	
	a) Electroluminescent cell ..	41
	b) Source of high voltage high frequency a.c. fields ..	44
	c) Dispersion unit ..	44
	d) Intensity measuring unit ..	46

CHAPTER-III	SPECTRAL ENERGY DISTRIBUTION OF E.L.EMISSION AND MECHANISM OF ELECTROLUMINESCENCE
3:1	A)Study of pure anthracene pyrene and perylene	..	48
3:1	B)Electroluminescence of two phase organic systems	..	
	i)Anthracene-pyrene system	..	59
	ii)Pyrene-perylene system	..	71
CHAPTER-IV	A)VOLTAGE AND FREQUENCY DEPENDENCE OF E.L.EMISSION		
	I)Voltage dependence of El. emission	..	85
	II)Frequency dependence of El. emission	..	114
	B)LUMINOUS EFFICIENCY	..	117
CHAPTER-V	SUMMARY	..	120
	REFERENCES	..	126
