Section	T i t l e	Page
CHAPTER-I		
	<u>Brief Survey of Boundary Layer Theory</u>	1
1.	Boundary Layer Concept	2
2.	Two Dimensional Boundary Layer	4
3.	Axially Symmetrical Boundary Layer.	8
4.	Three Dimensional Boundary Layer.	9
5.	Basic concepts required for our problems to be discussed in Chapter-II.	12
	References.	21
<u>CHAPTER-II</u>		
	<u>Approximate methods for the solution of the boundary layer equations.</u>	
1.	Introduction	27
2.	Approximate solution of Pohlhausen's problem of free convection on a heated vertical plate.	32
3.	Approximate solution of Ka'rm'an Pohlhausen's Method.	38
4.	Suction velocity at the point of separation for a boundary layer flow over a flat porous plate.	51
5.	Approximate solution of Pohlhausen's problem of forced convection on a heated vertical plate.	55
	References	74
