

## R E F E R E N C E S

- 1) D. H. NORRIE, G. VRIES (1978) : An introduction to Finite Element Analysis.
- 2) Eric B. Becker , Graham F. Carey , J. Tinsley Oden : Finite Elements, An Introduction Volume I.
- 3) O. C. Zienkiewicz , K. Morgan (1983) : Finite Elements and Approximation.
- 4) J. F. Botha , G. F. Pinder (1983) : Fundamental concepts in the numerical solution of Differential Equations.
- 5) J. N. Reddy (1985) : An introduction to the Finite Element Method.
- 6) Klaus-Jurgen Bathe , Edward L. Wilson (1976) : Numerical methods in the Finite Element Analysis.
- 7) A. R. Mitchell , R. Wait : The Finite Element method in Partial Differential Equations.
- 8) Richard L. Burden , J. Douglas Faires , Albert C. Reynolds: Numerical Analysis.
- 9) E. L. Wachspress : Rational Finite Element Basis.
- 10) P. G. Ciarlet , C. Wagschal : Multipoint Taylor formulas and applications to the Finite Element Method, Numer. Math., 17 84-100 (1971).
- 11) Garrett Birkhoff : Tricubic Polynomial Interpolation, Proc. Nat. Acad. Sci. U. S. A., Vol 68, No 6, pp 1162-1164 (1971).
- 12) R. J. Y. Mcleod : Hermite Interpolation over curved Finite Elements, Journal of Approximation theory, 18, (1976).
- 13) C. M. Anderson, R. J. Y. Mcleod : Integration techniques for isoparametric and higher order bases on the finite elements

- with a curved side, Comp. and Maths. with Appls., Vol 5  
pp 285-295.
- 14) R. J. Y. Mcleod : Higher Order transformation methods for curved finite elements, J. Inst. Maths. Appls., 21 ,(1978).
  - 15) G. Woodford, A. R. Mitchell, R. J. Y. Mcleod : An analysis of a cubic isoparametric transformation, International Journal for Numerical Methods in Engg, 12, 1587-1595 (1978).
  - 16) A. R. Mitchell : Advantages of cubics for approximating element boundaries, Comp. and Maths. with Appls., Vol 5 , pp 321- 327 (1979).
  - 17) J. L. Gout : Rational Wachspress-type finite elements on regular hexagons, IMA Journal of Numerical Analysis, 5, (1985) 59-77.
  - 18) M. L. Baart , R. J. Y. Mcleod : Recursive calculation of curved finite elements stiffness matrices , Comp. and Maths with Appls., Vol 10, No 4/5, pp 387-397 (1984).
  - 19) M. L. Baart , R. J. Y. Mcleod : Quadratic transformation of triangular finite elements in two dimensions, IMA Journal of Numerical Analysis, 6, 475-487 (1986).
  - 20) M. L. Baart , E. J. Mulder : A note on invertible two-dimensional Quadratic finite element transformations, Communication in Applied Numerical Methods, Vol 3, 535-539 (1987).
  - 21) M. L. Baart , R. J. Y. Mcleod : Rational curves and isoparametric transformations, Journal Comp. and Applied Mathematics ,18, 121-128 (1987).
  - 22) E. L. Wachspress (1989) : Polynomial Bases for algebraic elements.

- 23) P. L. Pawar , R. Rao : A Counterexample of the construction of  $C^1$  Rational Finite Elements.
- 24) M. L. Baart, R. J. Y. Meleod : Continuous Quadric Patch Approximation of Curved Surfaces, Computer Math. Applic. Vol.22, No.8,PP.11-20 (1991).
- 25) E.L. Wachspress (1989)  $C^1$  Rational finite Elements.
- 26) Ram.P.Manohar, Tat.y.NGAI: Automated Allocation of Mesh points for stiff two -point Boundry Value problems, Computer Math. Applic, Vol.22, No. 3 PP. 75-79 (1991).
- 27) C.A.J.Fletches, Computational Techniques for Fluid Dynamics Vol.II, Springer -Vestag (1988).
- 28) M.Dyduch, A.M. Habraken and S. Cescotto: A Variable density Grid Generation for Automaitc Remeshing Procensor in 2D Metalforming Simulations, Numerical Grid Generation in Computational Fluid Dynamics and Related fields (1991).
- 29) Y.Lauze, R. Camarero, H. Yang: Interactive Generation of Structured /Unstructured Surface Meshes using adaptivity, Numerical Grid Generation in Computational Fluid Dynamics and Related fields (1991).
- 30) N.P. Weatherill, B.K. Soni: Grid Adaptation and Refinement in Structured and Unstructured Algorithng Numerical Grid Generation in Computational Fluid Dynamics and Related fields.(1991).
