

ACKNOWLEDGEMENT

I gratefully acknowledge my deep sense of gratitude and appreciation to Dr. S.K. Haibatti, M.Sc., M.S. (Georgetown, Washington D.C., U.S.A.), Ph.D. for his keen interest, encouragement and valuable guidance throughout the course of this work and discussions presented in this dissertation.

I am thankful to Mr. S.J. Naik, Lecturer in Chemistry, The New College, Kolhapur, for his assistance in some of the measurements and to Mr. V.G. Chopade for his cooperation.

I owe my sincere thanks to my institution, Pravara Education Society's Padmashri Vikhe Patil College, Pravaranagar, and to Principal Dr. M.G. Hapse, who gave me an opportunity to undertake this research work.

Also I would like to make a grateful mention of the inspiration and encouragement I received from my parents, sisters and brother and particularly my teacher Shri J.G. Deshmukh, Lecturer in Chemistry at the Arts, Science and Commerce College, Ichalkaranji.

I would like to express my sincere thanks to Dr. M.H. Jagdale, Professor and Head, University Department of Chemistry, Shivaji University, Kolhapur, and to all other members of staff of the Department for their assistance, co-operation and to the authorities of Shivaji University,

ACKNOWLEDGEMENT contd.

Kolhapur for providing facilities to me for carrying out this work.

Finally I wish to extend my sincere thanks to all my well-wishers, colleagues and friends who helped me directly and indirectly in completing this work.

Kolhapur:
