

## C O N T E N T S

CHAPTER	I	INTRODUCTION	PAGE
		Introduction	1
	1.1	Historical	1
	1.2	Structure of Ferrites	3
	1.3	Ferrite-A Magnetic Material	8
		a) Magnetization in Ferrites	
		b) Anisotropy	
		c) Magnetostriction	
		d) Hysteresis	
		e) Permeability	
		f) Electrical Conductivity	
		g) Dielectric Behaviour	
	1.4	Theories of Ferrimagnetism: Neel's Theory	15
		a) Paramagnetic Susceptibility	
		b) Spontaneous Magnetization	
	1.5	Yafet-Kittle Theory	20
	1.6	Kaplan's Spiral Structure	20
	1.7	Orientation of Present Work	20
		References	25
CHAPTER	II	PREPARATION, CHARACTERISATION AND I.R. STUDIES	28
		Introduction	
		<u>Section-A: Preparation and Characterisation</u>	
	2.1	Methods of Preparation	28
	2.2	Hot-Pressing	31
	2.3	Actual Preparation of Ferrite Samples	33

2.4	Characterisation by X-ray Diffraction	35
	a) Powder Method	
	b) Indexing and Calculation	
2.5	Results and Discussion	38
	<u>Section-B: Infra-Red Studies</u>	
2.6	I.R.Spectra of Ferrites	49
2.7	Experimental	50
2.8	Results and Discussion	55
	References	58
CHAPTER III MAGNETIC PROPERTIES AND MICROSTRUCTURAL STUDIES		60
	<u>Section-A: Magnetic Properties</u>	
	Introduction	
3.1	Weiss Field	60
3.2	Exchange Interaction	61
3.3	Hysteresis	62
	a) Experimental Technique	
	b) Calibration and Measurement of Saturation Magnetization	
	c) Results and Discussion	
3.4	Curie Temperature	71
	a) Experimental Technique	
	b) Results and Discussion	
3.5	Permeability	76
	a) Experimental	
	b) Results and Discussion	

Section-B: Microstructural Studies

## Introduction

3.6 Microstructure and Ferrite	88
a) Electrical Properties	
b) Magnetic Properties	
3.7 Aspects of Microstructure	90
a) Sintering	
b) Grain Growth	
c) Exaggerated Grain Growth	
d) Porosity	
3.8 Experimental Technique	93
3.9 Results and Discussion	93
References	100

## CHAPTER IV ELECTRICAL PROPERTIES 104

## Introduction

Section-A: Electrical Conductivity

4.1 Conduction Mechanism in Ferrites	105
4.2 Electron Hopping and Polarons	106
4.3 Activation Energy	108
4.4 Experimental Technique	109
4.5 Results and Discussion	110

Section-B: Dielectric Constant

4.6 Dielectric Constant and A.C.	121
4.7 Dielectric Constant and Polarization	122
4.8 Experimental Technique	123
4.9 Results and Discussion	124
References	130

## CHAPTER V SUMMARY AND CONCLUSIONS 132

References	140
