CHAPTER NO.	TITLE	PAGE NO
	Introduction	1
	References	7
I	AMORPHOUS SEMICONDUCTORS	8
1.1	Band theory of solids	8
1.2	Semiconductors	10
1.3	Band Structure of semiconductor	11
1.4	Types of semiconductors	12
1.5	Fermi level in semiconductors	13
1.6	Amorphous semiconductors	16
1.7	Localized states	19
1.8	Anderson localization	23
1.9	Density of states	27
1.10	Mobility of shoulder	28
1.11	Defect model	30
1.12	Energy band diagram for amorphous semiconductors	33
1.13	Band model for amorphous semiconductors	36
	References	40
II	TRANSPORT PROPERTIES	42
2.1	D.C. electrical conductivity	42
2.2	Thermoelectric effect in semiconductor	52
2.3	Seeback effect	56
2.4	Thermoelectric power	59
2.5	Conduction by small polaron motion	62
2.6	Switching in non-crystalline semiconductors	65
	References	67

CHAPTER	TITLE		PAGE
III	EXPERIMENTAL DETAILS	...	69
3.1	Preparation of sample	...	69
3.2	X-Ray diffraction	...	72
3.3	I-V characteristics	...	74
3.4	D.C. Electrical Conductivity	...	77
3.5	Thermoelectric power	...	85
3.6	The study of transport properties of series Sb-Se-Cu	...	98
	References	...	107
IV	RESULT AND DISCUSSION	...	108
	Summary	...	126
	References	...	128
