

## C O N T E N T S

### CHAPTER I

#### INTRODUCTION

- 1.0 Introduction
- 1.1 Historical
- 1.2 Structure of ferrites
- 1.3 Spinel structure
- 1.4 Classification of ferrites
  - 1.4.1 Normal spinel ferrites
  - 1.4.2 Inverse spinel ferrites
  - 1.4.3 Random spinel ferrites
- 1.5 Types of ferrites
- 1.6 Electrical properties of ferrites
- 1.7 Dielectric behaviour
- 1.8 Magnetic properties of ferrites
- 1.9 Theories of ferrimagnetism
  - 1.9.1 Neel's theory of ferrimagnetism
  - 1.9.2 Paramagnetic region
  - 1.9.3 Spontaneous magnetization
- 1.10 Yafet-Kittle theory
- 1.11 Ferrite-Applications tree
- 1.12 Orientation of work

#### REFERENCES

### CHAPTER II

#### PREPARATION AND CHARACTERIZATION

- 2.0 Introduction

##### SECTION - A

- 2.1 Methods of ferrite preparation
- 2.2 Sintering
- 2.3 Actual method for preparation of ferrite samples

##### SECTION - B

- 2.4 X-ray diffraction : Introduction and principles
- 2.5 Experimental methods of x-ray diffraction
- 2.6 Experimental techniques
- 2.7 Results & discussion

## **SECTION - C**

- 2.8 Infra-red studies : Introduction
- 2.9 Experimental technique
- 2.10 Results & discussion

## **REFERENCES**

## **CHAPTER III**

### **ELECTRICAL PROPERTIES**

#### **3.0 Introduction**

#### **SECTION - A**

- 3.1 Conduction in oxides
- 3.2 Conduction in ferrites
- 3.3 Experimental technique
- 3.4 Results and discussion

#### **(SECTION - B**

- 3.5 Thermoelectric power
- 3.6 Experimental technique
- 3.7 Results and discussion

#### **SECTION - C**

- 3.8 A.C. electrical conductivity : Introduction
- 3.9 Dielectric constant and polarization
- 3.10 Experimental technique
- 3.11 Results and discussion/

## **REFERENCES**

## **CHAPTER IV**

### **MAGNETIC PROPERTIES**

#### **4.0 Introduction**

#### **SECTION - A**

- 4.1 Magnetization in ferrites
- 4.2 Magnetic anisotropy
- 4.3 Magnetostriction
- 4.4 Magnetization process
- 4.5 Hysteresis and domain state
- 4.6 Experimental techniques

- 4.7 Calculation of  $M_s$  and  $n_b$
- 4.8 Results and discussion
- 4.7 Calculation of  $M_s$  and  $n_b$
- 4.8 Results and discussion

**SECTION - B**

- 4.9 Curie temperature : Introduction
- 4.10 Experimental techniques
- 4.11 Results and discussion /

**SECTION - C**

- 4.12 A.C. susceptibility : Introduction
- 4.13 Experimental technique
- 4.14 Results and discussion

**REFERENCES**

**CHAPTER V**

**SUMMARY AND CONCLUSIONS**
