

## LIST OF TABLES

- 2.1 Lattice parameter data for  $x = 0.2$
- 2.2 Lattice parameter data for  $x = 0.4$
- 2.3 Lattice parameter data for  $x = 0.6$
- 2.4 Lattice parameter data for  $x = 0.8$
- 2.5 Lattice parameter data for  $x = 1.0$
- 2.6 Data on bond lengths and site radii
- 2.7 Data on X-ray density, actual density and porosity
- 2.8 Data on lattice vibration frequencies
- 3.1 Data on Activation energies and Curie temperatures
- 4.1 Data on saturation magnetization and magnetic moment at room temperature
- 4.2 Data on saturation magnetization and magnetic moment at low temperature
- 4.3 Data on  $4 M_s$  at room and low temperatures
- 4.4 Data on Curie temperatures for differently quenched samples by Laroia technique
- 4.5 Data on Curie temperatures by different method
