

LIST OF TABLES

	<u>Page No.</u>	
Table No.2.1	Showing details of samples prepared with various conc. of Dy (Mn Fixed)	52
Table No.2.2	Showing details of samples prepared with various concentration of Tb (Bi fixed)	52
Table No.2.3	Showing different samples prepared	53
Table No.2.4	X-ray diffraction data of (MD-39) sample	54
Table No.3.1	Showing correlation coefficient & decay constant obtained for typical samples	80
table No.3.2	Showing activation energies calculated from Peeling Off of decay Curves for typical samples	81
Table No.4.1	Table showing the peak temperature and peak intensity values obtained from glow curves. (uv-excited samples)	119
Table No.4.2	Showing activation energy calculated with different formulae (uv-excited samples)	120
Table No.4.3	Showing frequency factor & size of trap	121
Table No.5.1	values of threshold voltages for different frequencies	148
Table No.6.1	Showing the values of resistivity and conductivity at different temp. for (MD-39) , CaS-undoped samples	179
Table No.6.2	Showing values of resistivity & conductivity for (MD-30) CaS:Mn:Dy sample at different temperature	179
Table No.6.3	Showing values of Resistivity and Conductivity for (MD-19) CaS:Bi:Tb Sample at different temperature.	180
