CHAPTER	T I T L E	PAGE NO.
I	FERROELECTRICS ..	1
1.1	Introduction ..	1
1.2	Dielectric properties of Crystals ..	3
1.3	Ferroelectric materials and their Characteristic properties. ..	9
1.4	Spontaneous polarization. ..	13
1.5	Classification of ferroelectrics. ..	14
1.6	Theories of ferroelectricity. ..	17
	1.6(a) Thermodynamic theory ..	18
	1.6(b) Spontaneous polarization. ..	22
	1.6(c) Second order transition. ..	23
	1.6(d) First order transition. ..	25
	1.6(e) Model theories of ferroelectricity	30
1.7	Ferroelectric domains. ..	31
1.8	Applications. ..	33
	1.8(a) Linear properties. ..	34
	1.8(b) Non-linear properties. ..	34
1.9	Orientation of the present work. ..	35
	References ..	37
II	PREPARATION OF A SAMPLE AND DIELECTRIC HYSTERESIS. ..	40
	Part- I:Preparation of a Sample ..	40
2.1	Introduction. ..	40
2.2	Compound preparation ..	43
2.3	Preparation of NaVO ₃ ..	44
2.4	Preparation of KVO ₃ ..	45

CHAPTER	T I T L E	PAGE NO.
	Part- II: Dielectric Hysteresis.	45
2.5	Introduction.	46
2.6	Coercive field.	46
2.7	Effect of internal stresses, on Hysteresis loop.	48
2.8	Experimental details.	48
2.9	Hysteresis loop of NaVO_3	54
2.10	Hysteresis loop of KVO_3	54
	References	55
III	SOLID STATE BATTERY FORMATION	57
3.1	Introduction	57
3.2	Experimental	58
3.3	Solid State battery of NaVO_3	58
3.4	Solid State Battery of KVO_3	60
3.5	Results and Discussion	60
	References	65
IV	SECOND HARMONIC GENERATION AND TANDEL EFFECT	66
4.1	Introduction	66
4.2	Analysis of Second Harmonic generation.	70
4.3	Experimental	73
4.4	TANDEL of NaVO_3	75
4.5	TANDEL of KVO_3	75
4.6	Results and Discussion	78
	References	81
V	SUMMARY AND CONCLUSIONS	83
	References	87
	Acknowledgements	88
