CONFERENCES		iv
LIST OF FIGURES		v
A BRIEF SUMMERY OF THE DISSERTATION		vii
CHAPTER-I INTRODUCTION		1
	 1.1 Ionosphere 1.2 Ionospheric absorption 1.2a Deviative absorption 1.2b Non-deviative absorption 1.3 Methods of measuring ionospheric absorption 1.4 Advantage of the riometer 1.5 Working of the riometer 1.6 Cosmic radio noise 	2 4 7 8 8 10 13 14
CHAPTER ANTENNA	-li A ARRAYS AND RELEVENT THEORY	
	2.1 Introduction2.2 The thin linear antenna2.3 Linear arrays	16 17 22
CHAPTER ANTENNA	-III A FUNDAMENTALS	
3.4.1 Powe	3.1 Introduction 3.2 Reciprocity theorem 3.3 Applications of network theorems to antenna 3.4 Characteristics of the antenna er gain of the antenna	28 28 31 32 32

3.4.2 Directive gain	32
3.4.3 Effective area of the antenna	33
3.4.4 Antenna impedance	34
3.4.5 Transmission lines	36
3.4.6 Characteristic impedance	38
3.4.7 Radiation pattern	39
3.4.8 Polarisation	40
3.5 Types of antennas	40
3.5.1 Hertzian dipole	40
3.5.2 Half wave dipole	42
3.6 Antenna arrays	43
3.6.1 Broadside array	44
3.6.2 End-fire array	45
3.7 Impedance matching	45
3.7.1 Impedance matching for minimum reflection	47
3.7.2 Voltage and current relations	48
3.7.3 Standing wave pattern and standing wave ratio	52
DESIGNING AND CONSTRUCTION OF HIGH GAIN NARE	W
BEAMWIDTH ANTENNA ARRAY FOR RIOMETER	KOW .
BEAMWIDTH ANTENNA ARRAY FOR RIOMETER	
BEAMWIDTH ANTENNA ARRAY FOR RIOMETER 4.1 Introduction	55
BEAMWIDTH ANTENNA ARRAY FOR RIOMETER 4.1 Introduction 4.2 Pilot antenna	55 56
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array	55 56 59
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure	55 56 59 63
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array	55 56 59
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure	55 56 59 63 67
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V	55 56 59 63 67
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN 5.1 Introduction	55 56 59 63 67
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN	55 56 59 63 67
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN 5.1 Introduction 5.2 Block diagram of a riometer	55 56 59 63 67
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN 5.1 Introduction 5.2 Block diagram of a riometer 5.3 Standard antenna to measure the cosmic radio noise	55 56 59 63 67 INA 68 68
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN 5.1 Introduction 5.2 Block diagram of a riometer 5.3 Standard antenna to measure the cosmic radio noise absorption	55 56 59 63 67 INA 68 68
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN 5.1 Introduction 5.2 Block diagram of a riometer 5.3 Standard antenna to measure the cosmic radio noise absorption 5.4 Observations with solid state riometer	55 56 59 63 67 INA 68 68
4.1 Introduction 4.2 Pilot antenna 4.3 Antenna materials for the large array 4.4 The final antenna structure 4.5 Specifications of the antenna CHAPTER-V MEASUREMENTS AND TESTING OF A HIGH GAIN ANTEN 5.1 Introduction 5.2 Block diagram of a riometer 5.3 Standard antenna to measure the cosmic radio noise absorption 5.4 Observations with solid state riometer 5.5 Antenna measurements	55 56 59 63 67 INA 68 68 71 75 77

5.6 Method of calculating ionospheric attenuation using cosmic radio noise	85
CHAPTER- VI	
SCOPE FOR FUTURE STUDY	
 6.1 Introduction 6.2 Dependance of the total attenuation of cosmic radio noise on 30 MH_z on the critical frequency of the 	89
F ₂ - region	89
6.3 Separation of a day-time component symmetrical about noon from the total attenuation6.4 Analysis of cosmic noise absorption curves for	90
future study	91
6.5 Conclusion	98
