

INDEX

Sr. No.	Title	Page No.
Chapter I Magnetolectric composites		
SECTION A	MAGNETOELECTRIC COMPOSITES	1
1A.1	Introduction	1
1A.2	Magnetolectric composites	1
1A.3	Literature survey	2
SECTION B	FERRITES	4
1B.1	Introduction	4
1B.2	Classification of ferrites	4
1B.3	Spinel Ferrites	5
1B.4	Applications of Ferrites	7
1B.5	Literature survey on Co-Cd Ferrites	7
SECTION C	FERROELECTRICS	9
1C.1	Introduction	9
1C.2	Crystal structure of ferroelectrics	9
1C.3	Applications of ferroelectrics	10
1C.4	Orientation of problem	10
Chapter II Synthesis and structural analysis		
SECTION A	SYNTHESIS OF ME COMPOSITES	15
2A.1	Introduction	15
2A.2	Ceramic method	15
2A.3	Solid state reaction	16
2A.4	Flow chart of preparation of ferrites, ferroelectrics and ME composites	17
2A.5	Actual method of preparation	18
SECTION B	STRUCTURAL ANALYSIS X –RAY DIFFRACTION	19
2B.1	Introduction	19
2B.2	Experimental technique	20
2B.3	Results and discussion	20

SECTION C	MICROSTRUCTURAL CHARACTERIZATION SCANNING ELECTRON MICROSCOPY	30
2C.1	Introduction	30
2C.2	Effect of microstructure on properties	30
2C.3	Experimental technique	31
2C.4	Results and discussion	31
Chapter III Electrical properties		
SECTION A	DC RESISTIVITY	41
3A.1	Introduction	41
3A.2	Experimental technique	41
3A.3	Results and discussion	43
SECTION B	DIELECTRIC PROPERTIES	47
3B.1	Introduction	47
3B.2	Frequency dependent dielectric constant	48
3B.3	Experimental technique	49
3B.4	Results and discussion	50
Chapter IV Magnetic properties		
4.1	Introduction	58
4.2	Experimental technique	61
4.3	Results and discussion	61
Chapter V Magnetoelectric effect		
5.1	Introduction	72
5.2	Experimental technique	73
5.3	Results and discussion	75
Chapter VI Summary and conclusions		80
