CHAPTER NO.	TITLE	PAGE NO.
<b>I</b>	<b>AN INTRODUCTION TO COMPOSITE MATERIALS</b>	<b>1 - 10</b>
1.1	Need and advantages of composites	
1.2	Classification of composite materials	
1.2.1	Particle Reinforced Composites	
1.2.1a	Large particle composites	
1.2.1 b	Dispersion strengthened composites	
1.3	Ferrite-Ferroelectric Composites	
1.4	Survey of the work done in Ferrite Ferroelectric Composites	
1.5	Orientation of the problem	
	References	
<b>II</b>	<b>FERRITES AND FERROELECTRICS</b>	<b>11 - 33</b>
	<b>SECTION - A - FERRITES</b>	<b>11 - 22</b>
2A.1	Introduction	
2A.2	Historical development	
2A.3	Crystal structure of spinel ferrites	
2A.3.a	Chemical structure of spinel ferrites	
2A.3.b	Lattice structure of spinel ferrites	
2A.4.	Classification of ferrites	
2A.4.a	Normal spinel ferrite	

- 2A.4.b Inverse spinel ferrite
- 2A.4.c Random spinel ferrite
- 2A.4.2 Magnetic Interaction
- 2A.5 Ferrimagnetism
- 2A.6 Applications of Ferrites

**SECTION - B FERROELECTRICS****23 - 33**

- 2B.1 Introduction
- 2B.2 Crystallographic considerations and definition of a ferroelectric
- 2B.3 Classification of ferroelectrics
- 2B.4 Dielectric properties of ferroelectrics
- 2B.5 Ferroelectrics theory & applications
- References

**III PREPARATION OF FERRITE - FERROELECTRIC COMPOSITES AND CHARACTERIZATION****34 - 58****SECTION - A****34 - 40****PREPARATION OF FERRITE - FERROELECTRIC COMPOSITES**

- 3A.1 Introduction
- 3A.2 Standard ceramic method of preparation
- 3A.3 Actual method used for preparation
  - 3A.3.1 Preparation
  - 3A.3.2 Presintering and grinding
  - 3A.3.3 Pellet formation
  - 3A.3.4 Final sintering

**SECTION - B - X-RAY DIFFRACTION STUDIES 41 - 58**

3B.1 Introductory Remarks on Powder Method

3B.2 X-Ray Diffractometer

3B.3 Experimental technique

3B.4 Results and discussion

References

**IV SUM PROPERTIES OF COMPOSITES ELECTRICAL PROPERTIES 59 - 93**

4.1 Introduction

4.2 Dielectric dispersion

4.2.1 Dielectric constant measurement

4.2.2 AC conductivity

4.2.3 Experimental

4.2.4 Results and discussion

4.3 Dielectric constant variation with temperature

4.3.1 Experimental

4.3.2 Results and discussion

4.4 DC electrical resistivity

4.4.1 Experimental

4.4.2 Results and discussion

4.5 Thermoelectric power

4.5.1 Thermoelectric power measurement

4.5.2 Results and discussion

References

<b>V</b>	<b>PRODUCT PROPERTIES OF COMPOSITE</b>	<b>94 - 100</b>
	5.1 Introduction	
	5.2 Magnetoelectric effect	
	5.3 Measurement of DC $(ME)_{HB}$	
	5.4 Experimental	
	5.5 Results and discussion	
	References	
<b>VI</b>	<b>SUMMARY AND CONCLUSIONS</b>	<b>101 - 104</b>
	References
