

C O N T E N T S

1. Elementary Concepts	
<hr/>	
1.1 Introduction	1
1.2 The Three Principles Of Design Of Experiments	4
1.3 Classification Of Experimental Designs	6
1.4 Some Standard Designs	9
1.5 Analysis Of Variance	14
1.6 Some Definitions	18
2. Galois Field And Finite Geometries	23
<hr/>	
2.1 Definitions	23
2.2 Finite Projective Geometry	32
2.3 Finite Euclidean Geometry	37
3. Factorial Experiments	41
<hr/>	
3.1 Introduction	41
3.2 Notations And Definitions	43
3.3 Symmetrical Factorial Experiments	45
3.4 Confounding	78
3.4.1 Confounding In s^n -factorials Through Pencils	87
3.4.2. Confounding With The Help Of Pseudofactors	92
3.5 Fractional Factorials	93
4. Asymmetrical Factorial Experiments	106
<hr/>	
4.1 Introduction	106
4.2 Analysis Of Asymmetrical Factorial Experiments	108
4.3 Construction Of Asymmetrical Factorials	113
4.3.1 Construction Of Balanced Confounded Asymmetrical Factorials	116

4.3.2 Construction Of Asymmetrical Factorial With The Help Of Finite Geometries 120

4.3.3 Confounding With The Help Of Pseudofactors 122
