CONTENTS

CHAPTER	SECTION	TITLE
0		INTRODUCTION
I		SOME BASIC CONCEPTS
	1.1	Scope and Meaning of Reliability
	1.2	Different Reliability Measures
II		BURN-IN TEST AND OPTIMIZATION CRITERIA.
	2.1	Introduction
	2.2	Genesis of the Model
	2.3	M.L.E.'s for Progressively Censored Data
	2.4	Optimum Burn-in and Ultimate Hazard Rate
	2.5	Optimum Burn-in Period for Desired Quality
	2.6	Concluding Remarks
III		BAYESIAN INFERANCE IN RELIABILITY (ADVANTAGES OVER CLASSICAL INFERANCE)
	3.1	Fundamentals of Bayesian Statistical Inferance
	3.2	Sampling Theory verses Bayesian Inferance
	3.3	Bayesian Inferance in Reliability

CHAPTER	SECTION	TITLE
	3.4	Nature of Bayesian Inferance
	3.5	Bayesian Estimation Theory
	3.5	Bayesian Interval Estimation
IV		BAYESIAN APPROACH TO SOME PROBLEMS IN LIFE TESTING AND RELIABILITY ESTIMATION
	4.1	Introduction
	4.2	Reliability Estimation Under Squared Error Loss Function for Different Models
	4.3	Parametric Empirical Bayes Method.
	4.4	Asymmetric Loss Function
	4.5	Concluding Remarks
