

# C O N T E N T S

CHAPTER :-I	INTRODUCTION AND SUMMARY	PAGE NO.
1.1.	Introduction.	1
1.2.	Literature.	3
1.3.	Pre-requisite definitions.	4
1.3.1.	$\beta$ -Expectation tolerance interval.	
1.3.2.	$\beta$ -Content tolerance interval.	
1.4.	Distribution-free tolerance intervals.	8
1.5.	$\beta$ -Content tolerance limits for Normal distribution.	12
1.5.1.	One-sided tolerance limits.	
1.5.2.	Two-sided tolerance limits.	
1.6.	Chapterwise summary.	28
CHAPTER :-II GENERAL THEORY OF $\beta$ -EXPECTATION TOLERANCE INTERVALS.		
2.1.	Introduction.	30
2.2.	Terminology.	31
2.3.	Assumptions.	33
2.4.	Procedure to obtain expected coverage.	34
CHAPTER :-III $\beta$ -EXPECTATION TOLERANCE LIMITS FOR NORMAL DISTRIBUTION BASED ON A STRATIFIED RANDOM SAMPLES.		
3.1.	Introduction.	41
3.2.	Tolerance limits for stratified random sample.	42
3.3.	Expected coverage of an upper $\beta$ -expectation tolerance interval.	45
3.4.	Computations of expected coverage.	52

3.5. Expected coverage by regression method.	57
3.6. List of FORTRAN programs.	61
3.6.1. Main programs.	
3.6.2. Function programs.	

**CHAPTER :-IV TOLERANCE LIMITS FOR ONE PARAMETER EXPONENTIAL DISTRIBUTION :**

4.1. Introduction.	69
4.2. $\beta$ -content and $\beta$ -expectation tolerance intervals.	70
4.3. $\beta$ -expectation tolerance limits for stratified random sample.	74
4.4. Expected coverage of an upper $\beta$ -expectation tolerance interval.	77
4.5. Computations of expected coverage.	82
4.6. List of FORTRAN programs.	87
4.6.1. Main programs.	
4.6.2. Function programs.	

**CHAPTER :-V SUGGESTIONS FOR FURTHER STUDY.**

5.1. Introduction.	92
5.2. Summary of results.	92
5.3. Possible extensions and scope for further study.	93

**APPENDIX: - A**

1. SUBROUTINE - NEWTON RAPHSON METHODD
2. SUBROUTINE - RANDOM NUMBER GENERATION.
