1. Amari S. (1982)  
"Differential geometry of curved exponential families, curvature and information loss".  
Ann. Statist. 10, 357-385.
2. Andersen A.H. (1969)  
"Asymptotic results for exponential families".  
Bull. Int. Statist. Inst. 43, Book 2, 241-242.
3. Andersen E.B. (1970)  
"Sufficiency and exponential families for discrete sample space".  
J. Amer. Statist. Ass. 65, 1248-1255.
4. Barankin E.W. (1961)  
"Application to exponential families of the minimum dimensionality problem for sufficient statistics".  
B. Int. Statist. Inst. 38, 141-150.
5. Barankin E.W. and Maitra A. (1963)  
"Generalisation of the Fisher-Darmois-Koopman-Pitman theorem on sufficient statistics".  
Sankya A, 25, 217-244.
6. Bar-Lev S.K. and Eris P. (1984)  
"Reproducibility and natural exponential families with power variance functions".  
Preprint. Dept. of Statistics, S.U.N.Y. Buffalo.
7. Bar-Lev S.K. and Reiser P. (1982)  
"An exponential subfamily which admits UMPU tests based on a single test statistic".  
Ann. Statist. 10, 979-989.
8. Barndorff, Nielsen O. (1969)  
"Levy homeomorphic parametrization and exponential families".  
Z. Wahrscheinlichkeitstheorie Verw. Gebi etc., 12, 56-58.
9. \_\_\_\_\_ (1970)  
"Exponential families, Exact theory". various publications series No. 49. Inst. Mathematics, Aarhus Univ.  
Reproduced as part 1. Barndorff-Nielsen (1973a).

10. \_\_\_\_\_ (1973a)  
"Exponential families and conditioning". Sc.D. thesis,  
University of Copenhagen.
11. \_\_\_\_\_ (1973b)  
"Unimodality and exponential families".  
Comm. Statist. 1, 189-216.
12. \_\_\_\_\_ (1976)  
"Factorization of likelihood function for full  
exponential families".  
J. Roy. Statist. Soc. B, 38, 37-44.
13. Barndorff, Nielsen O. and Blaesild P. (1975)  
"S-ancillarity in exponential families".  
Sankya A, 37, 354-385.
14. \_\_\_\_\_ (1983)  
"Reproductive exponential families".  
Ann. Statist. 11, 770-782.
15. Barndorff, Nielsen O. and Kvist H.K. (1974)  
"Note on exponential families and M-ancillarity".  
Scand. J. Statist. 1, 36-38.
16. Barndorff, Nielsen O. and Pedersen K.C. (1968)  
"Sufficient data reduction and exponential families".  
Math. Scand. 22, 197-202.
17. Berger J.O. (1980)  
"Improving on inadmissible estimators in continuous  
exponential families with applications to simultaneous  
estimation of Gamma scale parameters".  
Ann. Statist. 8, 545-571.
18. Berk R.H. (1972)  
"Consistency and asymptotic normality of maximum  
likelihood estimators for exponential models".  
Ann. Math. Statist. 43, 193-204.
19. Bildikar Sheela. (1969)  
"On characterization of certain exponential type  
distributions".  
Sankya B, 31, 35-42.
20. Bhattacharya P.K. and Gupta S.D. (1964)  
"Classification between univariate exponential  
populations".  
Sankya A, 26, 17-24.

21. Borges R. and Pfanzagl J. (1965)  
"One parameter exponential families generated by transformation groups".  
Ann.Math.Statist. 36, 261-271.
22. Bradley E.L. (1973)  
"The equivalence of maximum likelihood and weighted least squares estimates in the exponential family".  
J.Amer.Statist.Ass. 68, 199-200.
23. Chentsov N.N. (1966)  
"A systematic theory of exponential families of distributions".  
Theory Prob. It's Appl. 11, 425-435.
24. Darroise G. (1935)  
"Sur les lois de probabilité a estimation exhaustive".  
C.R.Acad.Sci.Paris 260, 1265-1266.
25. Denny J.L. (1967)  
"Sufficient conditions for a family of probabilities to be exponential".  
Proc.Nat.Aca. of Sc. U.S.A. 57, 1184-1188.
26. Diaconis P. and Ylvisaker D. (1979)  
"Conjugate priors for exponential families".  
Ann.Statist. 7, 269-281.
27. Dominique M.A. Haughton (1988)  
"On the choice of a model to fit data from an exponential family".  
Ann.Statist. 16, 342-355.
28. Dynkin E.B. (1951)  
"Necessary and sufficient statistics for a family of probability distributions". (In Russian)  
An english translation is available in Select.Trans.Math. Statist.Prob\* 1, (1961), 23-41.
29. Efron B. (1976)  
"The Geometry of exponential families".  
Ann.Statist. 6, 632-676.
