

CONTENTS

	<u>PAGE</u>
<u>CHAPTER I</u> Introduction	1
<u>CHAPTER II</u> Classical Linear Model	6
2.1 Introduction	6
2.2 Classical Linear Model with K Independent Variates	7
2.3 Fitting of Classical Linear Model	10
2.4 Testing of Hypotheses	22
2.5 Residual Analysis	30
2.6 Limitation of the Theory of Classical Linear Models	35
<u>CHAPTER III</u> Generalised Linear Models	39
3.1 Introduction	39
3.2 Generalised Linear Model with K Explanatory variables	41
3.3 Link Functions	51
3.4 Fitting of Generalised Linear Models	52
3.5 Measures of Adequacy of the Fitted Model	64
3.6 Analysis of Deviance	72
3.7 Interpretation of the Fitted Model	73

3.8	Model Checking for Generalised Linear Model	74
3.9	Methods of Obtaining Robust Estimates	83
3.10	Generalised Linear Models with Varying Dispersion	86
3.11	Fitting of Generalised Linear Model With Varying Dispersion	89
<u>CHAPTER-IV</u>	Generalised Linear Models for Discrete Data	91
4.1	Introduction	91
4.2	Types of Binary Data	92
4.3	Distributions and Log Likelihood Functions	94
4.4	Link Functions	95
4.5	Fitting of Generalised Linear Models to the Binary Data	97
4.6	Model Checking	114
4.7	Other Methods of Analysing Binary Data	116
4.8	Log Linear Model (Bishop (1969))	117
4.9	Log Linear Model (Nelder & Wedderburn (1972))	120
<u>CHAPTER-V</u>	Quasi Likelihood Models	126
5.1	Introduction	126

5.2	Quasi Likelihood Function	127
5.3	Quasi Likelihood Model	134
5.4	Least Absolute Deviation Method for Fitting Quasi Likelihood Model	141
5.5	Extended Quasi Likelihood Function	143
5.6	Extended Quasi Likelihood Model	149
5.7	Model Fitting for Over Dispersed and Under Dispersed Grouped Binary Data	158
<u>CHAPTER-VI</u>	Data Analysis	161
6.1	Introduction	161
6.2	Analysis of the Data Set I	161
6.3	Analysis of the Data Set II	163
	Appendix-I	164 (a)
	Appendix-II	165 (a)
