CONTENTS

I. **Introduction and Summary** 1

1.1 Motivation, 1

1.2 Chapter wise summary, 11

II. **Sequential Estimation For Binomial and Multinomial Models** 13

2.1 Introduction, 13

2.2 Sequential Binomial Sampling Plans, 15

2.3 Sequential Procedures for Multinomial Estimation, 44

III. **Sequential Estimation For Exponential, Uniform Models and Minimum Of a Random Variable** 59

3.1 Itroduction, 59

3.2 Sequential Estimation of Exponential Location Parameter, 60

3.3 Sequential Estimation in the Uniform Density $U(\emptyset, \theta)$, 74

3.4 Sequential Estimation in the Uniform Density $U(\theta, 2\theta)$, 77

3.5 Sequential Method for estimating Minimum of a Random Varible,95

IV. Computational Studies 104

4.1 Introduction, 104

4.2 Stein's and Cooke's two-stage procedure, 104

4.3 A General two-stage procedure, 105

4.4 Performance study of Stein's and its Modified Version, 106

4.5 Performance study of Cooke's and General procedure, 108

Appendix - I(A), 112
Appendix - I(B), 114
Appendix - II(A), 117
Appendix - II(B), 119
Appendix - III, 121
Appendix - IV(A), 124
Appendix - IV(B), 127

References, 129
