

# C O N T E N T S

CHAPTER	T I T L E	PAGE
I	<u>INTRODUCTION</u>	1
	1.A Definition	1
	1.B Examples	1
	1.C Conceptual Background and Historical Developments.	3
	1.D Geometrical Aspects of Majorization.	8
II	<u>MAJORIZATION AND RELATED TOPICS</u>	12
	2.A Basic Notations	12
	2.B Weak Majorization	13
	2.C Doubly Stochastic Matrices and Permutation Matrices.	14
	2.D Characterization of majorization using doubly stochastic matrices.	18
	2.E Schor-Concavity and Schor-Convexity.	21
	2.F Operations preserving majorization.	24
III	<u>INEQUALITIES ON THE INTEGRAL OF A SYMMETRIC UNIMODAL FUNCTION OVER A SYMMETRIC CONVEX SET</u>	26
	3.A Conceptual Background	26
	3.B Anderson's theorem and related results	27
	3.C Probability Inequalities.	34

CHAPTER	T I T L E	PAGE
IV	<u>RESULTS IN MULTIVARIATE DISTRIBUTIONS THROUGH MAJORIZATION</u>	38
	4.A Conceptual Background	38
	4.B Marshall and Olkin's theorem and related results.	38
	4.C Applications	49
V	<u>INEQUALITIES FOR PROBABILITY CONTENTS OF CONVEX SETS OF FIXED VOLUME</u>	51
	5.A Conceptual Background	51
	5.B Theoretical Aspects	52
