

ACKNOWLEDGEMENT

First and foremost, I must acknowledge Dr. R. M. Chandak, lecturer and post graduate teacher in Zoology for suggesting this problem, for guiding my work and for successful completion of this dissertation.

Dr. A. T. Varute, Professor and Head of the Zoology Department and Dr. M. N. Nalavade, Reader in Zoology, Shivaji University, Kolhapur are another source of inspiration to me. They have always taken a keen interest in my work. I had an opportunity of being their student at the M. Sc. degree course. I shall always remain indebted to them for their help, guidance and for their admirable fatherly attitude towards me.

I am grateful to Late Prin. R. M. Rawerkar and Prin. V. A. Jamadagani, for admitting me in M. Phil. course of Shivaji University, Kolhapur. I also acknowledge Mr. V. R. Jogalekar, Lecturer and Head of the Zoology Department.

I thank all the members of the teaching staff and research students in the College Department of Zoology who have extended a helping hand whenever I requested. I also thank non-teaching staff of the department who have helped me in various ways.

Department of Zoology,
Physiology Section,
Yashwantrao Chavan College of Science
Vidyanagar, Karad - 415 110, (Dist - Satara),
Maharashtra, India.

November, 1988.
